A Paraconsistent Decision-Making Method Fábio Romeu de Carvalho, Jair Minoru Abe, 2018-06-13 This book presents a novel decision making support system based on paraconsistent annotated evidential logic which directly handles imprecise incomplete and contradictory data The authors offer insights into areas such as engineering and biomedicine as well as related fields Decision analysis is useful in making choices when the consequences of actions are uncertain like in business administration where it assists in making investment decisions and in health care Decision analysis is also valuable when the possible actions may lead to conflicting consequences A fundamental tenet of decision analysis is that even though the available information is incomplete a decision must be made Thus analyses often contain assumptions about or estimates of missing data The contribution that this method can provide to professionals and companies has significant relevance in terms of the impact of information systems on productivity and quality of the companies the lack of training companies for proper planning and management of information systems and the need for interdisciplinary treatment of several sectors of almost all related scientific areas This book is a valuable resource for professionals seeking a competitive edge in their performance

Porter,Sheila Ann Dean,Paul S. White,Sarah Wilmot,2001 A Brief History of the Relationship Between Confucianism, Daoism, and Buddhism Zhongjian Mou,2023-01-01 Chinese traditions of Confucianism Daoism and Buddhism have a profoundly philosophical dimension The three traditions are frequently referred to as three paths of moral teachings In this book Mou provides a clear account of the textual corpus that emerges to define each of these traditions and how this canonical axis was augmented by a continuing commentarial tradition as each generation reauthorized the written core for their own time and place In his careful exegesis Mou lays out

the differences between the more religious reading of these traditions with their defining practices that punctuate the human journey through life and the more intellectual and philosophical treatment of the texts that has and continues to produce a first order culture of annotation that become integral to the traditions themselves At the center of the alternative religious experience reflected throughout the teachings of Confucianism Daoism and Buddhism is the project of personal cultivation as it comes to be expressed as robust growth in family and communal relations For Mou these three highly distinctive and yet complementary ways of thinking and living constitute a kind of moral ecology wherein each of them complements the others as they stand in service to a different dimension of the human need for an educated spirituality
