A Living History of Immunology Kendall Arthur Smith,2015-11-04 In the highly competitive world of biomedical science often the rush to publish and to be recognized as first with a new discovery concept or method is lost in the hurly burly of the moment as the maddening crowd moves on to the next new thing One of the great things about immunology today is that it has only become mature as a science within the last half century and especially within the past 35 years as a consequence of the revolution of molecular immunology which has taken place only since 1980 Consequently most of those who have contributed to our new understanding of how the immune system functions are still alive and well and still contributing Thus A Living History of Immunology collates many stories from the investigators who actually performed the experiments that have established the frontiers of immunology Accordingly this volume combats revisionist science by those who want to alter history by telling the stories a different way than actually happened In this regard one of the good things about science vs other disciplines is that we have the written record of what was done when it was done and by whom Even so we do not have the complete story or narrative of how and why experiments were done and what made the differences that led to success This volume captures and chronicles some of these stories from the past fifty years in immunology

adopted and the results they produced The book takes on a twofold objective to understand how many of today s problems have roots whose branches extend back in time and to draw from the lessons of history useful insights for endowing the European Union with an ambitious agricultural and rural development policy suited to the challenges ahead General Studies Paper I EDITORIAL BOARD,2015-01-09 Developed by experienced professionals from reputed civil services coaching institutes and recommended by many aspirants of Civil Services Preliminary exam General Studies Paper I contains Precise and Thorough Knowledge of Concepts and Theories essential to go through the prestigious exam Solved Examples are given to explain all the concepts for thorough learning Explanatory Notes have been provided in every chapter for better understanding of the problems asked in the exam v spublishers The Future of High-Cost Credit Jodi Gardner,2022-07-14 This book proposes a new way of thinking about the controversial and complex challenges associated with the regulation of high cost credit specifically payday lending These products have received significant attention in both the media and political arena The inadequacy of regulatory interventions has created ongoing problems with the provision of high cost credit particularly for consumers with lesser bargaining power and who are already financially vulnerable The book tackles two specific gaps in the existing literature The first involves inadequate analysis of the relevant philosophical concepts around high cost credit which can result in an over simplification of what are particularly complex issues The second is a lack of engagement in both the market and lived experience of borrowers resulting in limited understanding of those who use these financial products The Future of High Cost Credit explores the theoretical grounding policy initiatives and interdisciplinary perspectives associated with high cost credit making a novel and insightful contribution to the existing literature The problems with debt extend far beyond the legal sphere and the book will therefore be of interest to many other academic disciplines as well as for those working in public policy and the third sector Public Workers in Service of America Frederick W. Charismatic Leadership in Organizations Iga Maria Lehman,2024-09-04 History is full of examples of how the skilful use of language is a fundamental aspect of charismatic leadership Traditionally this phenomenon has been studied focusing on oratory skills The book argues that the relationship between a leader and a follower has points of similarity to that which exists between a writer and a reader and that in each case former party is the agenda setter but satisfactory outcomes require a mutual endeavor Given that scholarly writing about management and organizations is

inevitably a mix of the presentation of empirical truths and value judgements the ability to engage the reader intellectually and emotionally is critical in the successful dissemination of disciplinary knowledge and belief claims The book proposes a multi faceted construct of textual charisma which is created through the use of metaphors stories and personal accounts as well as the ancient construct of *pistis* and the contemporary notion of metadiscourse The proposed framework provides guidance for management and organization studies authors seeking to present themselves as convincing and engaging writers
