History Paper2 Memorandum September 2014:

Professional Journal of the United States Army ,2017-03 Military Review ,2017 **Designing Mobility and Transport Services** Mike Tovey,Andree Woodcock,Jane Osmond,2016-11-10 European cities increasingly face problems caused by transport and traffic For many people transport provision is unsatisfactory and current arrangements are leading to a deteriorating environment A fundamental problem is that our currently fragmented approach makes it difficult to understand fully the circumstances and needs of transport users In any overall approach public transport is a crucial component Designing Mobility and Transport Services shows how these issues can be addressed and resolved The development of an inclusive validated passenger experience measurement instrument is the first step in understanding the situation and thus tackling it It is needed if we are to create high quality user centred integrated accessible public transport services which are capable of attracting and retaining public transport users whilst meeting sustainability targets The METPEX research project was devised to tackle these issues Coordinated by Coventry University the METPEX consortium brought together 16 European partners from 12 countries The project s underlying rationale was the proposition that if transport operators and authorities were provided with a robust reliable and tailorable means of measuring the whole multimodal passenger journey they could improve service provision The book describes how such an improvement can be achieved to attract travellers out of their private vehicles thereby reducing congestion and pollution and increasing health and well being It provides a template for a creative approach and a meta design narrative in designing for transport systems to enhance mobility choices by improving the door to door journey and thus underpin sustainable transport initiatives
