

How to Write a Journal Article Review APA Style

Reviewing journal articles is an important assignment on its own or as part of a much larger research paper as it helps in understanding the research concepts and formulating a rich and relevant theoretical foundation for the research and is an elementary phase before writing the literature review.

Instructions

1. Search the library's online databases, such as EbscoHost and others, to find scholarly or peer-reviewed articles. Articles should be from peer-reviewed or scholarly journals and relate to the field of study that the research discusses.
2. Read the entire article. Many journal articles can be quite complex and use complicated wording and statistics. You may need to read the article a few times before you get a full grasp of it.
3. Write a citation for the journal article at the top of the review. The citation should follow the American Psychological Association's style--consult the APA-style manual or the link under Resources for citation information. You will need the title of the article, the journal where the article is published, the volume and issue number, publication date, author's name and page numbers for the article.
4. Don't copy from the article, paraphrase the relevant literature, methodology and results you want to include in your review.

HOW TO DO IT:

The proper form for your journal article review. It should be two-three pages long, typed, double spaced for each article you review.

Write full reference on the top of the page using APA style

Example:

Wood, D. (2003). Effect of child and family poverty on child health in the United States. *Pediatrics Sep2003 Supplement*, Vol 112, 3, 707-712

First, select the related literature from the article.

After reading the article and reviewing its components, select the relevant literature to your research topic (such as definitions - concepts- factors-
