Melgar,2020-04-28 Buildings are one of the main causes of the emission of greenhouse gases in the world Europe alone is

responsible for more than 30% of emissions or about 900 million tons of CO₂ per year Heating and air conditioning are the main cause of greenhouse gas emissions in buildings Most buildings currently in use were built with poor energy efficiency criteria or depending on the country and the date of construction none at all Therefore regardless of whether construction regulations are becoming stricter the real challenge nowadays is the energy rehabilitation of existing buildings It is currently a priority to reduce or ideally eliminate the waste of energy in buildings and at the same time supply the necessary energy through renewable sources The first can be achieved by improving the architectural design construction methods and materials used as well as the efficiency of the facilities and systems the second can be achieved through the integration of renewable energy wind solar geothermal etc in buildings In any case regardless of whether the energy used is renewable or not the efficiency must always be taken into account The most profitable and clean energy is that which is not consumed

Building a Sustainable Home Melissa Rappaport Schiffman, 2018-08-07 The green building movement has produced hundreds of how to books and websites that are filled with tips about green building and what homeowners should do to go green While helpful and informative when it comes to making actual purchasing and installation decisions these books do not make it any easier for a homeowner to prioritize against a budget Here Schiffman shares her knowledge and experience for others to use in their journey toward a greener way of living Whether the reader is building a new home or doing a minor remodel a homeowner needs a framework by which to guide their decisions These decisions are based on values and the author posits that there are really only three reasons to go green For Our Health By building more sustainably we reduce our exposure to harmful chemicals and toxins For Our Wealth By building a more durable home and being more efficient with resources like water and electricity we reduce our monthly utility bills and ongoing maintenance expenses For Our Soul Collectively doing the right thing for our planet does make a difference and that is soul nourishing Learn the logistics of choosing windows insulation appliances and lighting Find out about FSC certified wood and about using reclaimed materials Here is everything you need to make your home sustainable
