Excerpt

Hyperion is a Hugo Award winning 1989 science fiction novel by American writer Dan Simmons

It is the first book of his Hyperion Cantos and is the only book in it to extensively employ the literary device of the frame story

The plot of the novel is highly complex featuring multiple time lines and characters

This book is succeeded by the 1990 science fiction novel

The Fall of Hyperion of the same writer

In the 28th century humanity has spread across the galaxy first aboard Hawking drive ships and then through farcasters which permit nigh instantaneous travel between them regardless of the distances

The farcaster network the WorldWeb is the infrastructural and economical basis of the Hegemony of Man and thus determines the whole culture and society

Also flowing across these portals are the structures of the datasphere a network reminiscent of the Internet in design but far more advanced

In that lurks the powerful knowledgeable and utterly inscrutable TechnoCore the vast agglomeration of millions of AIs who run almost every piece of high technology of mankind

The unthinking hubris of man resulted in the death of the home world Earth and this arrogant philosophy was carried forth to the stars for centuries

The Hegemony itself is a largely decadent society relying on its military to incorporate into the WorldWeb the colony planets even unwillingly and also to defend the

Each carries a desperate hope and a terrible secret

And one may hold the fate of humanity in his hands

Anatomy of Science Fiction Donald E. Morse, 2009-03-26 This wide ranging collection of essays re opens the connection between science fiction and the increasingly science fictional world Kevin Alexander Boon reminds us of the degree to which the epistemology of science fiction infects modern political discourse K roly Pint r explores the narrative structures of utopian estrangement and Tam s B nyei and Brian Attebery take us deeper into the cultural exchanges between science fiction and the literary and political worlds In the second half Donald Morse Nicholas Ruddick and va Federmayer look at the way in which science fiction has tackled major ethical issues while Amy Novak and K lm n Matolcsy consider memory and evolution as cultural batteries The book ends with important discussions of East German and Hungarian science fiction by Usch Kiausch and Donald Morse respectively I envisage that the book will find a market both among academics and as a recommended text to undergraduates as it offers interesting essays on important readers The tendency for science fiction to be offered as a literature class to science majors is not usually considered but this book would be particularly appropriate for such a market Dr Farah Mendelsohn Middlesex University *Final Frontier* John Hamilton, 2006-08-15 Introduces young readers to the world of science fiction FALL OF HYPERION.
