Palmer,2018-09-03 Apocalypse and Reform from Late Antiquity to the Middle Ages provides a range of perspectives on what reformist apocalypticism meant for the formation of Medieval Europe from the Fall of Rome to the twelfth century It explores and challenges accepted narratives about both the development of apocalyptic thought and the way it intersected with cultures of reform to influence major transformations in the medieval world Bringing together a wealth of knowledge from academics in Britain Europe and the USA this book offers the latest scholarship in apocalypse studies It consolidates a paradigm shift away from seeing apocalypse as a radical force for a suppressed minority and towards a fuller understanding of apocalypse as a mainstream cultural force in history Together the chapters and case studies capture and contextualise the variety of ideas present across Europe in the Middle Ages and set out points for further

Bureau of Education, 1889 United States Army in World War Ii Harry L. Coles, Albert K. Weinberg, 1986 A documentary history with brief narrative introductions illustrating the evolution of civil affairs policy and practice in the Mediterranean and European theaters Most important of all in World War II soldiers became governors in a much broader sense than ever before so much more than was foreseen that the Army's specialized training proved scant preparation for perhaps the most important phase of their role They became not merely the administrators of civilian life for the Army s immediate needs but at the same time the executors and at times even by force of circumstances the proposers of national and international political policy This broader role arose from the fact that in World War II the Allies strove to realize from the very beginning of occupation political aims that had usually not been implemented during war or if during war at all not until active hostilities had ended Thus in enemy countries civil affairs officials were immediately to extirpate totalitarian governmental and economic systems in liberated countries they were as soon as possible to aid in restoring indigenous systems and authorities and in both types of countries they were to make an all out effort to effect gradual transition toward the envisaged postwar national and international order Obstetrics J.
