Safety Tips on Cleaning with Chemicals

1

Read the Safety Data Sheets before using any sort of cleaning chemicals. Beware of safety warnings associated with the chemicals you will use.

2

Concentrated liquids should be diluted carefully and in a proper ratio. Learn the instruction leaflet before using the chemicals.

3

Wear gloves and goggles when cleaning with chemicals. Harmful chemicals can cause burns on skin and irritation to eyes.

4

Avoid inhalation of harmful fumes of the chemicals. Open the windows or any ventilation when cleaning with bleach or any other chemicals. Fresh air will remove potentially toxic fumes, dust and odors in the area.

5

Store cleaning chemicals in a well-ventilated area away from HVAC intake vents. This helps prevent any fumes from spreading to other areas of the facility.

6

Keep all cleaning chemicals in their original containers. Never mix two cleaning chemicals unless you know it is safe to do. Mixing bleach with ammonia can create toxic fumes. Common mistakes are by reusing old containers which still contain traces of the old chemical.

7

Don't sniff a bottle to identify its contents. Harmful fumes of the chemicals may damage your lung and nasal passage. Make sure to label all containers with applicable chemical information in addition to their risks and dangers.

8

Don't spill. Spilling chemicals such as bleach can be very damaging to clothes, floors and carpets, beside exposing the risk of slip and fall.

9

Dispose chemicals that have not been used for a prolonged period of time.

10

Wash hands properly after working to avoid any contamination.
