Integrated Early Childhood Behavioral Health in Primary Care Rahil D. Briggs,2016-07-26 This book provides a step by step guide to integrating early childhood behavioral health care into primary care with hands on advice for creating implementing and evaluating programs It discusses the unique advantages of pediatric primary care as a setting for mental health services from birth into the early school years particularly for addressing parent child stress and trauma issues Contributors illustrate in depth how bringing behavioral health into pediatric services can engender care that is replicable and sustainable not only cost effective but also clinically effective Guidelines and case examples from frontline practitioners highlight typical challenges and workable recommendations Among the featured topics The fit between early intervention programs and primary care Staffing workforce development and funding issues On the job teamwork concerns from time constraints to continuity of care Culturally competent care geared toward key child care issues Intervening with parents of young children in the integrated pediatric setting Integrated Early Childhood Behavioral Health in Primary Care is an essential resource for clinicians practitioners graduate students and researchers in child and school psychology pediatrics and social work Cancer in Context James Brennan,Clare Moynihan,2004 This book offers healthcare professionals academics and anyone affected by cancer a fresh and original approach to the supportive care of people with cancer It looks at the underlying reasons why cancer so often leads to high levels of distress and more importantly it suggests many practical ways distress can be minimised and prevented The actual experiences of cancer patients as recorded in their personal diaries are combined with theory research and practical clinical advice In each of its seven chapters Cancer in Context takes a different perspective towards supportive care in cancer It begins by considering how people in general manage and adjust to massive changes in their lives and in particular how they react to the threat of cancer It goes on to examine the lived experience of people with cancer as they negotiate the many changes and challenges that follow their diagnosis Of course cancer doesn't only affect the person who has the disease it also impacts on families partners and carers One chapter explores these and other issues such as sexual difficulties the needs of older people single people and gay and lesbian couples Chapter 4 shows that the social and cultural context of a person's life is critical to understanding their resources the way they are treated and the responses they make to serious illness However it is in the clinical context that professionals have an opportunity to minimise disruption to their patients quality of life as they endure the notorious demands of oncology treatments The book offers practical clinical advice on psychosocial aspects of conventional cancer treatments common treatment difficulties cancer rehabilitation and palliative care Chapter 6 provides a summary of the burgeoning area of information and communication skills within healthcare and finally the book ends by considering how doctors nurses radiographers and other healthcare professionals can maintain their supportive care in light of such high

levels of stress and burnout among these staff groups
