and find ways not just to survive the collapse but to live it In this book the sequel to *How Everything Can Collapse* the authors show that a change of course necessarily requires an inner journey and a radical rethinking of our vision of the world Together these might enable us to remain standing during the coming storm to develop a new awareness of ourselves and of the world and to imagine new ways of living in it Perhaps then it will be possible to regenerate life from the ruins creating new alliances in differing directions with ourselves and our inner nature between humans with other living beings and with the earth on which we dwell *Archaeology Outside the Box* Hans Barnard, 2023-05-15 *Archaeology Outside the Box* makes contemporary archaeology germane to the general public as well as to researchers in other disciplines In thirty one richly illustrated chapters a wide variety of projects is presented by an international group of anthropologists archaeologists architects and artists These aim to broaden the applicability of archaeology by reflecting on archaeological remains in novel ways or by addressing contemporary concerns with archaeological theory and research methods Demonstrating the fascinating and pertinent nature of archaeology the authors go far beyond its definition as a discipline that unearths objects of ancient material culture Many chapters also provide arguments relevant to the soul searching discussions currently taking place within archaeology worldwide and accelerated by the Black Lives Matter movement and the recent Covid 19 pandemic
