Division - The Aviation Corporation
Service Department
WILLIAMSPORT, PENNA.

Date: April 23, 1945

SERVICE BULLETIN NO. 106

Subject: Inspection of O-143 and CO-143 Engines for oil leaks at No. 1 and No. 4 cylinder bases.

To: Authorized Lycoming Service Stations, Repair Stations and Owners

We have had a few isolated complaints of oil leaks at the bases of No. 1 and No. 4 cylinders. Inspection disclosed a crack caused by stamping of the heat number on these cylinder barrels. It will be noted that the heat number is stamped only on No. 1 and No. 4 cylinders and this practice has now been discontinued. The leak will usually appear in the rounded section where the cylinder is blended into the crankcase as shown in the accompanying illustration, Figure 1. It is imperative that on inspection be made of all engines at the bases of No. 1 and No. 4 cylinders immediately and at first indication of any oil leak kindly report this to your nearest Authorized Lycoming Service Station or the Service Department of the Aviation Manufacturing Corporation, Lycoming Division, Williamsport, Pa., furnishing the following information: engine number, total hours, hours since overhaul, make and model of airplane.
