Safety belts

All vehicle occupants, including those in the rear, must buckle up – even if it's just a short trip. For the best possible protection by the seat belts and airbags, the seat position must be close to the steering wheel or the instrument panel. Keep the seats in an upright position and make sure that the belts are fixed properly to the height of you and your passengers. Keep your feet on the floor at all times.

Seat position and distance to steering wheel

Always adjust the driver's seat to the steering wheel so that there is a minimum of 10 inches (25 cm) between your kneecaps and the steering wheel. Otherwise, the airbag system cannot protect you properly in the event of an accident and can increase your risk of serious personal injury and death.
