Lahnenman, Rubén Arcos, 2014-03-13. Since the 9/11 attacks the number of intelligence courses and related curricula have soared. Such tools however take time and effort to develop and are not circulated among faculty. This is the first textbook to offer in one volume original simulations, exercises and games designed by academics and intelligence professionals from several countries. These innovative methods are meant to enhance the learning experience and provide an international perspective to the topics and approaches discussed in class. Intelligence simulations and games are presented in ready-to-run formats from easy instructions to result recordings, matrices to minimize preparation time for both instructors and students. Exercises such as cyber attack simulation, information sharing, ethical scenarios and more expose the student to the many subtle aspects of the intelligence enterprise through active role playing in simulations and game exercises. The cases cover a wide range of key analytical issues and contexts with an international focus for an innovative text that will suit intelligence training courses at all levels. **The British National Bibliography** Arthur James Wells, 2009.
