Ryan Gunderson, 2021-10-29 What is to be done when the future is already ablaze With the international spread of right wing populism widening inequalities precarious forms of labor becoming normative surveillance capitalism and a worsening ecological crisis the future is bleak One issue in particular the likelihood of catastrophic climate change coupled with the lack of a global movement with the organization and vision to effectively challenge our suicidal social order yields the crushing awareness that future generations will be trapped in prehistory one in which humanity continues to be dominated by its own creations instead of shaping the historical process in line with reason Expanding upon the ideas of Theodor W Adorno Ernst Bloch Lucien Goldmann and others Ryan Gunderson examines the modes of action and thought through which we react to the likelihood of a catastrophic future in ways that reproduce instead of challenge the status quo and how we can instead productively sustain the search for a better world against all odds

Utopia Matters Marinela Freitas, 2005

Imagining Urban Complexity Frans-Willem Korsten, Anthony T. Albright, 2024-07-30 Imagining Urban Complexity introduces passionate and critical perspectives on the link between the humanities and urban studies It emphasizes tropes media and genres as cultural techniques that shape complexity in urban environments by distributing affordances modes of sensing and modes of sense making Focusing on urban political and cultural dynamics in 24 global cities the book shows that urban environments are thematized in literature and art but are also entities that are shaped perceived interpreted and experienced through sense making techniques that have long been central concerns of the

humanities These techniques the book argues activate a dialectic between urban imaginations and cancellations Tropes media and genres are aesthetically and politically powerful they propel imaginations and open up multiplicities of urban possibilities they naturalize actualized orders and they cancel alternatives The book moves between close readings of city spaces and more systemic and infrastructural approaches to urban environments providing tools and strategies that can be adapted and extended to understand urban complexity in different cultural and political contexts The book speaks to global audiences from a continental philosophical tradition It is relevant to undergraduates postgraduates and academic researchers in the fields of critical urban studies urban design comparative literature cultural studies cultural analysis ecocriticism political theory and ethics
