Developing Future-ready Learners for a Global Age Suzanne S. Choo,Woon Chia Liu,Bee Leng Chua,2024-12-02 Suzanne S Choo Woon Chia Liu and Bee Leng Chua offer a dynamic look into the tripartite relationship between education research policy and practice that characterizes Singapore s changing education landscape Over the years Singapore has garnered increasing attention internationally for its world class education system Pushing back against the stereotypical notions of exam and teacher centric education in Asia the contributors to this volume discuss opportunities as well as challenges in Singapore s innovation towards constructivist critical culturally responsive and cosmopolitan forms of learning Highlighting the pedagogical innovation and its context in Singapore s teacher education and schools the authors bridge

theory and practice by providing an understanding of innovative practices informed by key shifts in Singapore's education policies and the key conceptual principles informing these practices. More importantly, it provides on the ground empirical insights into the ways these innovative pedagogical practices are enacted in the classroom and in teacher education programmes. Each chapter provides an in depth understanding of how these pedagogies are applied across various subject disciplines including guided problem solving in Mathematics, games based pedagogy in Science, multimodal literacies in language, ethical criticism in Literature, Nonlinear Pedagogy in Physical Education, multicultural approaches in music, and dialogic pedagogy in drama among others. Balancing theoretical and empirical focus, this resourceful text will be of interest to students, researchers and practitioners in educational development, pedagogy and teacher education as well as policymakers across international fields in education.

Handbook of Self-Regulation of Learning and Performance Dale H. Schunk, Barry Zimmerman, 2011-05-15. Self regulated learning or self regulation refers to the process whereby learners personally activate and sustain cognitions, affects and behaviours that are systematically oriented toward the attainment of learning goals. This is the first volume to integrate into a single volume all aspects of the field of self regulation of learning and performance: basic domains, applications to content areas, instructional issues, methodological issues and individual differences. It draws on research from such diverse areas as cognitive, educational, clinical, social and organizational psychology. Distinguishing features include: Chapter Structure: To ensure uniformity and coherence across chapters, each chapter author addresses the theoretical ideas underlying their topic, research evidence bearing on these ideas, future research directions and implications for educational practice. International: Because research on self regulation is increasingly global, a significant number of international contributors are included (see table of contents). Readable: In order to make the book accessible to students, chapters have been carefully edited for clarity, conciseness and organizational consistency. Expertise: All chapters are written by leading researchers from around the world who are highly regarded experts on their particular topics and are active contributors to the field.

Optimal Learning Environments to Promote Student Engagement David J. Shernoff, 2013-05-29. Optimal Learning Environments to Promote Student Engagement analyzes the psychological, social and academic phenomena comprising engagement, framing it as critical to learning and development. Drawing on positive psychology, flow studies and theories of motivation, the book conceptualizes engagement as a learning experience, explaining how it occurs or not, and how schools can adapt to maximize it among adolescents. Examples of empirically supported environments promoting engagement are provided, representing alternative high schools, Montessori schools and extracurricular programs. The book identifies key innovations including community school partnerships, technology supported learning and the potential for engaging learning opportunities during an expanded school day. Among the topics covered: Engagement as a primary framework for understanding educational and motivational outcomes; Measuring the malleability, complexity, multidimensionality and sources of engagement; The relationship between engagement and achievement.

Supporting and challenging the instructor's role in promoting engagement Engagement within and beyond core academic subjects Technological innovations on the engagement horizon Optimal Learning Environments to Promote Student Engagement is an essential resource for researchers professionals and graduate students in child and school psychology social work educational psychology positive psychology family studies and teaching teacher education *Learning Analytics in Education* David Niemi, Roy D. Pea, Bror Saxberg, Richard E. Clark, 2018-08-01 This book provides a comprehensive introduction by an extraordinary range of experts to the recent and rapidly developing field of learning analytics Some of the finest current thinkers about ways to interpret and benefit from the increasing amount of evidence from learners experiences have taken time to explain their methods describe examples and point out new underpinnings for the field Together they show how this new field has the potential to dramatically increase learner success through deeper understanding of the academic social emotional motivational identity and meta cognitive context each learner uniquely brings Learning analytics is much more than analyzing learning data it is about deeply understanding what learning activities work well for whom and when Learning Analytics in Education provides an essential framework as well as guidance and examples for a wide range of professionals interested in the future of learning If you are already involved in learning analytics or otherwise trying to use an increasing density of evidence to understand learners progress these leading thinkers in the field may give you new insights If you are engaged in teaching at any level or training future teachers faculty for this new increasingly technology enhanced learning world and want some sense of the potential opportunities and pitfalls of what technology can bring to your teaching and students these forward thinking leaders can spark your imagination If you are involved in research around uses of technology improving learning measurements better ways to use evidence to improve learning or in more deeply understanding human learning itself you will find additional ideas and insights from some of the best thinkers in the field here If you are involved in making administrative or policy decisions about learning you will find new ideas and dilemmas coming your way from inevitable changes in how we design and deliver instruction how we measure the outcomes and how we provide feedback to students teachers developers administrators and policy makers For all these players the trick will be to get the most out of all the new developments to efficiently and effectively improve learning performance without getting distracted by shiny technologies that are disconnected from how human learning and development actually work **Media Rich Instruction** Rosemary Papa, 2014-06-27 E learning has brought an enormous change to instruction in terms of both rules and tools Contemporary education requires diverse and creative uses of media technology to keep students engaged and to keep up with rapid developments in the ways they learn and teachers teach Media Rich Instruction addresses these requirements with up to date learning theory and practices that incorporate innovative platforms for information delivery into traditional areas such as learning skills and learner characteristics Experts in media rich classroom experiences and online instruction delve into the latest findings on student cognitive processes and motivation to learn while offering

multimedia classroom strategies geared to specific curriculum areas Advances such as personal learning environments gamification and the Massive Open Online Course are analyzed in the context of their potential for collaborative and transformative learning And each chapter features key questions and application activities to make coverage especially practical across grade levels and learner populations Among the topics included Building successful learning experiences online Language and literacy reading and writing Mathematics teaching and learning with and through education technology Learning science through experiment and practice Social studies teaching for learner engagement The arts and Technology Connecting school to community At a time when many are pondering the future of academic standards and student capacity to learn Media Rich Instruction is a unique source of concrete knowledge and useful ideas for current and future researchers and practitioners in media rich instructional strategies and practices *Transforming Curriculum Through Teacher-Learner Partnerships* Nair, Pradeep, Keppell, Michael James, Lim, Chee Leong, Mari, Tamil Salvi, Hassan, Nurhanim, 2020-12-11

Empowering learners for life requires a fundamental shift in higher education curriculum design New priorities pedagogies technologies spaces and assessment strategies are required to enable learners to take ownership of their learning Student centeredness concepts are still prescriptive in nature as most decisions on curriculum assessment teaching and learning approaches are still teacher centric Teachers are developing student centered learning environments without the involvement of the learners in the planning decision making and or design process In addition some lecturers are still practicing the traditional approaches of content delivery and conventional assessment methods rather than experimenting with innovative practices suited for student centered approaches Therefore there is an ongoing need for research focused on the importance and effectiveness of a paradigm shift in education that involves student teacher partnerships fueled by innovative teaching and learning designs where students take an active role and contribute as partners in learning

Transforming Curriculum Through Teacher Learner Partnerships captures experiences and evidence among teachers in exploring the possibility of active student participation in curriculum design delivery and assessment through teacher learner partnership The chapters address issues of teacher learner partnerships in designing the learning environment and how student centered methods create resilient adaptable and future capable learners While highlighting topics within this scope such as learner autonomy learning performance self efficacy and teaching pedagogy this book is ideally intended for teachers administrators teacher educators practitioners stakeholders researchers academicians and students interested in issues related to the teacher learner partnership *Japanese Language and Soft Power in Asia* Kayoko Hashimoto, 2017-07-26 This cutting edge collection considers how the Japanese language functions as a key element of Japanese soft power in Asia Within Japanese culture itself the promotion of language has been an area of ambivalence This interdisciplinary book looks across the fields of language policy language teaching socio linguistics cultural studies and history to identify the links between Japan's language policies and broader social economic and political processes It examines the challenges that

undermine Japan's potential soft power by identifying a gap between the official Japan portrayed by the Japanese government and the cultural Japan that foreigners perceive. It also reveals historical continuity in the way Japanese language is perceived and promoted by policy makers and how the current practices of Japanese language teaching in Asian countries have been shaped within the framework of international exchange which has been a key concept in Japanese foreign policies since the 1970s. It particularly considers the concept of Cool Japan as a symbol of Japan's interpretation of its cultural power and offers a thoughtful assessment of the future of Japanese as a form of soft power in Asia as the country prepares for the 2020 Tokyo Olympics.

Conceptual Frameworks for Giftedness and Talent Development Tracy L. Cross, Paula

Olszewski-Kubilius, 2021-09-03 *Conceptual Frameworks for Giftedness and Talent Development* explores current and enduring theories and comprehensive models of giftedness and talent development. Each chapter includes a description of the model, theory, or framework; shares the most important implications of each model, including underrepresentation and social justice issues; includes discussion questions for use with students and professionals. The editors also consider common issues across conceptual frameworks such as the degree to which achievement defines giftedness, the goal of gifted education, and the role of psychosocial factors. This is a comprehensive reference for scholars and practitioners in the field, as well as those studying at the graduate level.

Teach Reading, Not Testing Liz Hollingworth, Hilleary M. Drake, 2012 *Teaching IS* rocket science and you are the pilot. *Teach Reading, Not Testing* reinforces what teachers already know: test preparation worksheets and drill-and-kill activities do not make children into lifelong readers. The authors' conscientious approach to reading instruction combines an insider perspective on the development of high-stakes tests with classroom experience in achieving successful reading outcomes at the elementary and secondary levels. Their research-based methodology, building on teachers' expertise about best practice, is based on five key components: Aligning instruction to the state or national core standards; Using formative assessment; Connecting units to real-world contexts; Motivating students effectively; Holding on to best practice in literacy instruction. Included are end-of-chapter quizzes and real-life scenarios, plus a full chapter on teaching literacy with special populations. Readers will find helpful solutions for teaching children to love reading in the midst of the accountability movement and an approach to test preparation that doesn't require teachers to sacrifice everything they already know about teaching kids to read.
