

- Introduction - 2 min
  - Introduce myself to students, thank them for having me in their classroom, let them know how excited I am to be here today
- Framing - 4 min
  - Today, our objective is to make inferences about the main character in Sandra Cisneros's *Eleven*
  - Does anyone know what an inference is? Raise your hands
  - An inference is an educated guess. This means you take what you know, plus what you read, and create a conclusion. (write on the board)
  - Everyone say it with me on 3: *what you know + what you read = inference*
- Post Mortem - 35 minutes
  - We are going to start off by reading our text and completing an activity called Post Mortem in order to analyze our main character's thoughts, feelings and actions. When you see this diagram, what does it make you think of? (a crime scene) That's right. It's like an outline of a crime scene, but I promise our story is not spooky. We are going to use a diagram like this to map our character's thoughts, feelings and actions. Cold call: where do you think the thoughts will go? Where do you think the feelings will go? Where do you think the actions will go? **5 min**
  - Now, we're going to split into groups. (make groups then cold call to CFU groups) I also need a volunteer to help me make our diagram. (make the diagram on craft paper) Now, group 1 come and sit by the head. Group 2, come and sit on the left side of the body. Group 3, come and sit by the hands and feet on the right side. **5 min**
  - I'm going to do an example with you all first, so you can

**The Unified Learning Model** Duane F. Shell, David W. Brooks, Guy Trainin, Kathleen M. Wilson, Douglas F. Kauffman, Lynne M. Herr, 2009-12-01 This is a book about how humans learn Our focus is on classroom learning although the principles are as the name of this book indicates universal We are concerned with learning from pre school to post graduate We are concerned with most business industrial and military training We do not address how infants learn how to speak or walk or how grown ups improve their tennis swing We do address all learning described by the word thought as well as anything we might try to teach or instruct in formal educational settings In education the words theory and model imply conjecture In science these same words imply something that is a testable explanation of phenomena able to predict outcomes of experiments This book presents a model of learning that the authors offer in the sense of scientists rather than educators Conjecture implies that information is incomplete and so it surely is with human learning On the other hand we assert that more than enough is known to sustain a scientific model of learning This book is not a review of the literature Instead it is a synthesis Scholars and many teachers likely have heard much if not most or even all of the information we use to develop the unified learning model What you have not read before is a model putting the information together in just this way this is the first one
