Math from Three to Seven Aleksandr K. Zvonkin,2011 This book is a captivating account of a professional mathematician s experiences conducting a math circle for preschoolers in his apartment in Moscow in the 1980s As anyone who has taught or raised young children knows mathematical education for little kids is a real mystery What are they capable of What should they learn first How hard should they work Should they even work at all Should we push them or just let them be There are no correct answers to these questions and the author deals with them in classic math circle style he doesn t ask and then answer a question but shows us a problem be it mathematical or pedagogical and describes to us what happened His book is a narrative about what he did what he tried what worked what failed but most important what the kids experienced This book does not purport to show you how to create precocious high achievers It is just one person s story about things he tried with a half dozen young children Mathematicians psychologists educators parents and everybody interested in the intellectual development in young children will find this book to be an invaluable inspiring resource In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people their parents and teachers and the

mathematics profession Titles in this series are co published with the Mathematical Sciences Research Institute MSRI
