analysis to unpack the construction and development of the management style known as managerialism emergent in the 1990s US and UK higher education systems and the social dynamics and power relations embedded within the discourses at the heart of managerialism in today's universities. Each chapter introduces a particular aspect of neoliberal discourse in higher education and uses these multiple linguistic approaches to analyze linguistic data in two case studies and demonstrate these principles at work. This multi-layered systematic linguistic framework allows for a nuanced exploration of neoliberal institutional discourse and its implications for academic labor, offering a critique of the managerial system in higher education but also a larger voice for alternative discursive narratives within the academic community. This important work is a key resource for students and scholars in applied linguistics, Critical Discourse Analysis, sociology, business and management studies, education and cultural studies.
