capacities and alliances to advance new feminist alternatives      African Economic Development Christopher Cramer, John Sender, Arkebe Oqubay, 2020 This book challenges conventional wisdoms about economic performance and possible policies for economic development in African countries Its starting point is the striking variation in African economic performance Unevenness and inequalities form a central fact of African economic experiences The authors highlight not only differences between countries but also variations within countries differences often organized around distinctions of gender class and ethnic identity For example neo natal mortality and school dropout have been reduced particularly for some classes of women in some areas of Africa Horticultural and agribusiness exports have grown far more rapidly in some countries than in others These variations and many others point to opportunities for changing performance reducing inequalities learning from other policy experiences and escaping the ties of structure and the legacies of a colonial past The book rejects teleological illusions and Eurocentric prejudice but it does pay close attention to the results of policy in more industrialized parts of the world Seeing the contradictions of capitalism for what they are fundamental and enduring may help policy officials protect themselves against the misleading idea that development can be expected to be a smooth linear process or that it would be were certain impediments suddenly removed The authors criticize a wide range of orthodox and heterodox economists especially for their cavalier attitude to evidence Drawing on their own decades of research and policy experience they combine careful use of available evidence from a range of African countries with political economy insights mainly derived from Kalecki Kaldor and Hirschman to make the policy case for specific types of public sector investment      Working with indigenous knowledge Fhumulani M. Mulaudzi, Rachel T. Lebeso, 2022 The aim of the book is to assist both local and international scholars in articulating the scholarly discourse on indigenous health attitudes practices and experiences The indigenous lens that was used to generate and disseminate indigenous knowledge in this book will strengthen indigenous scholarship thus making it accessible to a wider audience In addition the information shared in this book will add value for scholars and assist them with the indigenous knowledge needed to address sustainable development goals This book is timely and topical as the discourse on the decolonisation of the curriculum is widely debated in the higher education space The discourse on the scholarship of indigenous knowledge as the tacit local knowledge that stems from cultural practices within communities has not been well articulated in the current health science education milieu Indigenous knowledge has remained overlooked and undermined for a very long time and the information remains untapped in local communities The scholars who conducted the research on which this book is based unearthed a wealth of knowledge which was tacit in nature and translated it into implicit knowledge that can be documented and shared with other scholars globally This knowledge will assist health care scholars in benefiting from knowledge practices and cultural beliefs that will assist them in health care planning teaching evidence based practice and further research      *Redefining the Psychological Contract in the Digital Era* Melinde Coetzee, Alda Deas, 2021-02-18 This book introduces the psychological contract as a multi level contextual construct
