Clark's Procedures in Diagnostic Imaging A Stewart Whitley, Jan Dodgeon, Angela Meadows, Jane Cullingworth, Ken Holmes, Marcus Jackson, Graham Hoadley, Randeep Kulshrestha, 2020-01-06 Bringing together conventional contrast media studies computed tomography ultrasound magnetic resonance imaging radionuclide imaging including hybrid imaging using SPECT CT and PET CT DXA studies and digital interventional procedures into one volume this definitive book is the essential source of information on the use and application of these imaging modalities in radiography Taking a systemic anatomical approach carefully designed to be clear and consistent throughout and mirroring that in the popular and established textbook Clark's Positioning in Radiography each chapter is highly illustrated and contains sections detailing anatomy pathologic considerations procedure methodology and an evaluation of recommended imaging modalities Reflecting the latest clinical imaging pathways and referral guidelines including IR ME R 2017 the Map of Medicine and RCR iRefer 8E Clark's Diagnostic Imaging Procedures will quickly become established as the standard textbook for students of radiography and radiographer assistant trainees and an invaluable desk reference for practising radiologists *Cardiac CT* Marc Dewey, 2014-05-22

Cardiac computed tomography CT has become a highly accurate diagnostic modality that continues to attract increasing attention This extensively illustrated book aims to assist the reader in integrating cardiac CT into daily clinical practice while also reviewing its current technical status and applications Clear guidance is provided on the performance and interpretation of imaging using the latest technology which offers greater coverage better spatial resolution and faster imaging while also providing functional information about cardiac diseases The specific features of scanners from all four main vendors including those that have only recently become available are presented Among the wide range of applications and issues discussed are coronary calcium scoring coronary artery bypass grafts stents and anomalies cardiac valves and function congenital and acquired heart disease and radiation exposure Upcoming clinical uses of cardiac CT such as hybrid imaging preparation and follow up after valve replacement electrophysiology applications myocardial perfusion and fractional flow reserve assessment and plaque imaging are also explored **Deep Learning Methods and Applications in Brain**

Imaging for the Diagnosis of Neurological and Psychiatric Disorders Hao Zhang, Da Ma, Lei Wang, 2024-10-14 Brain imaging has been successfully used to generate image based biomarkers for various neurological and psychiatric disorders such as Alzheimer's and related dementias Parkinson's disease stroke traumatic brain injury brain tumors depression schizophrenia etc However accurate brain image based diagnosis at the individual level remains elusive and this applies to the diagnosis of neuropathological diseases as well as clinical syndromes In recent years deep learning techniques due to their ability to learn complex patterns from large amounts of data have had remarkable success in various fields such as computer vision and natural language processing Applying deep learning methods to brain imaging assisted diagnosis while promising is facing challenges such as insufficiently labeled data difficulty in interpreting diagnosis results variations in data

acquisition in multi site projects integration of multimodal data clinical heterogeneity etc The goal of this research topic is to gather cutting edge research that showcases the application of deep learning methods in brain imaging for the diagnosis of neurological and psychiatric disorders We encourage submissions that demonstrate novel approaches to overcome various abovementioned difficulties and achieve more accurate reliable generalizable and interpretable diagnosis of neurological and psychiatric disorders in this field

Application of Emerging Technologies in the Diagnosis and Treatment of Patients with Brain Tumors: New Frontiers in Imaging for Neuro-oncology

Domenico Aquino,Valentina Pinzi,Camilla Russo,Vincenzo Di Nunno,Elena De Martin,2025-06-18

Continued advancements in medical imaging systems have significantly enhanced our ability to timely and accurately visualize body tissues and disease related processes Such advancements are gradually responding to a pressing need for personalized medicine representing an always more pervasive urgency in every medical field this is all the more true with regard to neuro oncology and physicians have now to deal with it This shift toward precision medicine defined as the right treatment for the right patient at the right time has called for innovative approaches to provide aggregation of different techniques different disciplines and different professionals in order to ensure to patients with brain tumors the highest efficacy in both diagnostic and therapeutic capabilities In this interdisciplinary or cross disciplinary vision of neuro oncology brain imaging represents a compelling source of crucial information used by clinicians and surgeons and the flourishing of scientific literature based on image post processing analysis artificial intelligence radiomics and other fast growing automations in data analysis has been revolutionizing the way of both understanding and applying neuroimaging for treatments This Research Topic aims to deepen the readers understanding of novel medical imaging techniques and image guided procedures for brain tumors diagnosis and treatment or rather integrating these advancements into clinical practice In this light it will provide new insights on the latest strides in medical imaging for brain tumors diagnosis and therapeutic management This Research Topic will also focus on the importance of the combination of different techniques from various clinical domains to fulfill their potential in a pluralist approach that might lead to a more personalized therapy in patients with brain neoplasms in that regard of special interest will be the fast evolving field of artificial intelligence in neuro oncology and neuro oncological imaging
