Hamilton, 2014-04-24 Interest and research on regionalism has soared in the last decade Local governments in metropolitan areas and civic organizations are increasingly engaged in cooperative and collaborative public policy efforts to solve problems that stretch across urban centers and their surrounding suburbs Yet there remains scant attention in textbooks to the issues that arise in trying to address metropolitan governance **Governing Metropolitan Areas** describes and analyzes structure to understand the how and why of regionalism in our global age The book covers governmental institutions and their evolution to governance but with a continual focus on institutions David Hamilton provides the necessary comprehensive in depth description and analysis of how metropolitan areas and governments within metropolitan areas developed efforts to restructure and combine local governments and governance within the polycentric urban region This second edition is a major revision to update the scholarship and current thinking on regional governance While the text still provides background on the historical development and growth of urban areas and governments efforts to accommodate the growth of metropolitan areas this edition also focuses on current efforts to provide governance through

The Rise and Fall of Urban Economies Michael Storper, Thomas Kemeny, Naji Makarem, Taner Osman, 2015-09-02 Today the Bay Area is home to the most successful knowledge economy in America while Los Angeles has fallen progressively further behind its neighbor to the north and a number of other American metropolises Yet in 1970 experts would have predicted that L A would outpace San Francisco in population income economic power and influence The usual factors used to explain urban growth luck immigration local economic policies and the pool of skilled labor do not account for the contrast between the two cities and their fates So what does The Rise and Fall of Urban Economies challenges many of the conventional notions about economic development and sheds new light on its workings The authors argue that it is essential to understand the interactions of three major components economic specialization human capital formation and institutional factors to determine how well a regional economy will cope with new opportunities and challenges Drawing on economics sociology political science and geography they argue that the economic development of metropolitan regions hinges on previously underexplored capacities for organizational change in firms networks of people and networks of leaders By studying San Francisco and Los Angeles in unprecedented levels of depth this book extracts lessons for the field of economic development studies and urban regions around the world
