5. Use interpolation (estimation based on surrounding values) and extrapolation to estimate and label elevations of all points below that are not labeled. Then add contour lines using a contour interval of 100 feet. Notice how the 0-foot and 100-foot contour lines have already been drawn.

6. Sometimes your data will be in between the lines, and you need to interpolate. The letters X and Y on the map at right are not associated with any dot markers.

Use interpolation to give some elevation values between the lines.

What is the elevation at Y? 250

What is the elevation at Z? 400

5. Practice interpolating: Contour the map below. Use a 10 ft contour interval.
