consequences but also stand to benefit the most if policy makers pay sufficient attention to their needs Faced with these challenges along with tight budgets and increased emphasis on results oriented value for money countries are searching for solutions Increased accountability often tops the list The 2017 8 GEM Report shows the entire array of approaches to accountability in education It ranges from countries unused to the concept where violations of the right to education go unchallenged to countries where accountability has become an end in itself instead of a means to inclusive equitable and high quality education and lifelong learning for all The report emphasizes that education is a shared responsibility While governments have primary responsibility all actors schools teachers parents students international organizations private sector providers civil society and the media 0 3 have a role in improving education systems The report emphasized the importance of transparency and availability of information but urges caution in how data are used It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions In an era of multiple accountability tools the report provides clear evidence on those that are working and those that are not Back cover

Teacher Leadership in International Contexts Charles F. Webber, 2023-03-23 This book addresses the critical gaps among understandings of teacher leadership across organizational and cultural contexts It challenges the use of the term teacher leadership as if there is a widely shared understanding of what it is and what it means for exercising influence and making decisions The book describes how implicit meanings and competing assumptions about teacher leadership may contribute to uncertainty and confusion in school communities The authors caution against the incorporation of teacher leadership in international policy making discussions without adequate consideration of contextual organizational historical and cultural differences that may lead to school community members struggling to accommodate the concept or worse ignoring other frameworks for facilitating more culturally appropriate decision making This book shares the findings of research conducted in several North American European African Latin American and Australasian contexts as part of the International Study of Teacher Leadership Study findings are used to posit contextualized conceptualizations of teacher leadership and to offer a perspective for positioning researchers and practitioners in the international teacher leadership discourse
