Mitchell, 2025-01-27 This handbook presents a broad and comprehensive overview of research and practices in geography education at primary and secondary levels from birth to about age 18 It summarizes the current state of knowledge in this sub discipline of geography Including authors representative of many geography education traditions the book pays equal attention to learning and teaching and to respect student voices and includes rich in case studies evidence based research and specific examples It also emphasizes ways that geography education can contribute to global concerns about social justice diversity equity and inclusion as well as ways it can help to prepare the next generation of informed critical and reflective members of societies The book is divided into five sections Purposes of geography education Why is it taught Perspectives on geography education What is taught Practices of geography education How is it organized and taught Preparation of geography educators How are geography educators prepared Possibilities for geography education What is the future of geography education By providing broad perspectives and lively and accessible writing this handbook is a useful tool for novice geography educators teacher educators educational policy makers support staff such as librarians and media resource specialists curriculum developers and assessment experts in many world regions **Pearson Physical Geography** Dennis DesRivieres, 2007 **Global Perspectives in the Geography Curriculum** Alex Standish, 2008-10-07 For geographers across the globe this book provides the arguments for a return to the teaching of geography and why they should reject the politicisation of the subject by education policy makers and politicians Standish's careful critique shows the necessity of a depoliticised geography curriculum the irony of which would be that it would ensure that every child could point to Iraq Iran and Afghanistan on a map Prof Dennis Hayes Oxford Brookes University UK A prescient and critical analysis of the changing face of geography teaching This book deserves to be widely read and debated Alex Standish's book puts current trends in geography teaching in historical and critical context It comprises a forthright and timely defence of geographical education for its own sake Dr Jim Butcher FRSA Department of Sport Science Tourism and Leisure Canterbury Christ Church University Since the early 1990s educational policy makers and some subject leaders have been seeking to fundamentally change the teaching of geography in UK and US schools from a subject which encourages students to explore spatial concepts ideas and skills to a more ethics based subject concerned with the promotion of environmentalism cultural diversity and social justice In this book the new approach is critically examined within a historical and ideological context addressing a number of fundamental questions Should geography be used as a tool for the delivery of citizenship ideals How does this affect the intellectual and moral value of geographical education for young people If the state and teachers are taking more responsibility for the values attitudes and emotional responses of students how will they learn to develop these qualities for themselves If global perspectives shift the focus of education from learning about the outside world to learning

about the self what is its vision of social progress and conception of social change This book advocates a return to liberal models of education arguing that the new approach to geography currently being promoted for schools fundamentally undermines the educational value of the subject and the freedom of young people to shape the world in which they live A vital resource for teachers and student teachers alike Global Perspectives in the Geography Curriculum makes a significant contribution to the growing debate about the future direction of the discipline itself
