The Bahamas International Monetary Fund. Western Hemisphere Dept., 2018-05-14 This Selected Issues paper makes the case for a rules based fiscal framework for The Bahamas and discusses its design calibration and implementation The IMF staff recommends adopting a headline deficit ceiling and a cap

on current expenditure growth both calibrated to guide debt toward a suitable medium term anchor while allowing room for stabilization A headline deficit target is simpler to communicate and monitor than a structural balance rule Such a framework would allow expanding capital spending up to the limit provided by the deficit ceiling in the event of improvements in revenue performance Moreover in line with best practices the framework should be anchored around a pre defined medium term debt target that will guide the calibration of proposed operation rules The Saturday Review of Politics, Literature, Science, Art, and Finance ,1864
