**Teaching Secondary Mathematics** Gregory Hine, Judy Anderson, Robyn Reaburn, Michael Cavanagh, Linda Galligan, Bing H. Ngu, Bruce White, 2021-09-24 Teaching Secondary Mathematics is the essential guide for preservice mathematics teachers in Australia EFA Global Monitoring Report – 2013–2014 – Teaching and Learning Achieving quality for all UNESCO, 2014-02-04 The 2013 2014 Education for All Global Monitoring Report shows that a lack of attention to education quality and a failure to reach the marginalized have contributed to a learning crisis that needs urgent attention Worldwide 250 million children many of them from disadvantaged backgrounds are not learning the basics Teaching and Learning Achieving Quality for All describes how policy makers can support and sustain a quality education system for all children regardless of background by providing the best teachers The Report also documents global progress in achieving Education for All goals and provides lessons for setting a new education agenda post 2015 In addition the Report identifies that insufficient financing is hindering advances in education Last Bell Carl Bistany, Stephanie Gruner Buckley, 2015-11-05 In the mid nineties the Alfred Glickman School was just another failing school in one of America s most violent cities Then SABIS a private for profit education provider took over Twenty years later the school is a six time silver medalist in U S News World Report s annual America s Best High Schools listing and every single graduate of the school has been offered a college place With success of this magnitude you would think that for profit managed charter schools like

SABIS would be in high demand On the contrary they are fought at every turn Why is the idea of employing for profit companies to help rescue failing public schools treated with fear and hostility Stranger still why does a nation built on free enterprise refuse to embrace a free market strategy when so many students and schools would clearly benefit and with so much at stake Last Bell is a book about politics money and power It examines the charge that for profits running charter schools are in it for the money not the kids and reveals the real motives of those spreading these ideas and why they fight private sector involvement in public schools Last Bell is a reasonable voice in a polarized debate It does not call for an end to public schools but rather imagines a future in which private companies help create a competitive market for public education to boost performance turn derelict schools into centers of excellence and give parents even in the worst neighborhoods real choice and their children a future

*Mathematics Education in the Early Years* Tamsin Meaney, Ola Helenius, Maria L. Johansson, Troels Lange, Anna Wernberg, 2016-01-22 This book presents chapters based on papers presented at the second POEM conference on early mathematics learning These chapters broaden the discussion about mathematics education in early childhood by exploring the debate about construction versus instruction Specific sections investigate the teaching and learning of mathematical processes and mathematical content early childhood teacher development transitions for young children between home and preschool between home and school and between preschool and school The chapters use a range of innovative theoretical and methodological approaches which will form an interesting basis for future research in this area

Handbook of BRICS and Emerging Economies PB Anand, Shailaja Fennell, Flavio Comim, 2020-12-16 Ever since Jim O'Neill at Goldman Sachs coined the term BRICS in 2001 there have been many different assessments of these major emerging economies with some even proclaiming that the promise of the BRICS comprising Brazil Russia India China and South Africa is over However the so called arranged marriage still seems to be working well with the club having become a formal international forum with summit declarations ministerial meetings and numerous BRICS wide fora Is this euphoria misplaced Is there a BRICS model of economic and human development Are inequalities increasing and is this the denouncement of the economic successes Are geo political tensions rising between these nations During the post COVID 19 situation the importance of bilateral and multilateral co operation mechanisms and institutions is becoming clear This book focuses on one such emerging co operation mechanism of BRICS but also more widely on those five countries and other similar economies As a global depression looms large global economic recovery depends on the performance of not only its largest economies but also many other important and significant economies within the so called G20 group Even prior to the COVID 19 outbreak multilateral institutions have been under considerable strain as with the relationship between the United States of America and China and risks to global economic recovery appear very real This book brings together multi disciplinary perspectives from over sixty scholars and it presents a comprehensive and deep dive into the BRICS and emerging economies and into an understanding the political economic and social contexts that can help in designing approaches for recovery and

*The Decline in Educational Standards* James D. Williams, 2019-04-15 The Decline in Educational Standards From a Public Good to a Quasi Monopoly is about the commodification of education and the factors that have changed education from a public good into a commodity over the last 50 years When we look at today s education we see that academic standards in public education have been declining for decades even as education funding has reached nearly a trillion dollars per year to fund such failed programs as No Child Left Behind and Common Core Simultaneously tuition and fees at public universities have increased nearly 2000 percent over the last 30 years and student loan debt is now a staggering 1.5 trillion Quite simply education has become big business This book examines the various issues associated with the commodification of education especially neoliberalism and privatized Keynesianism what they are how they developed and how they have affected education and public policy It argues that neoliberalism and the related socioeconomic shift to debt based consumerism are at the center of commodification leading to a significant decline in the exchange value of a college degree It also argues that we cannot understand the changes in our public and higher education systems without examining the historical social economic and political factors that have essentially created an education system that is significantly different from what it was in the not so distant past

**Women in STEM Education** Lisbet

Rønningsbakk, Karen Blackmore, 2023-12-05 We are delighted to present the inaugural Women in Education series of article collections At present less than 30% of researchers worldwide are women Long standing biases and gender stereotypes are discouraging girls and women away from science related fields and from pursuing a career in academia and in different professional environments especially when linked to STEM fields Science and gender equality are however essential to ensure sustainable development in all disciplines In order to change traditional mindsets gender equality must be promoted stereotypes defeated and girls and women should be encouraged to pursue academic careers Therefore Frontiers in Education is proud to offer this platform to promote the work of women scientists educators and professionals across all fields of STEM Education Female representation still needs to be improved in key roles in the field and the way in which an

equitable education contributes to fairer and less biased academic and professional environments worldwide should be more investigated The work presented here highlights the diversity of research performed across the entire breadth of STEM Education research and presents advances in theory experiment and methodology with applications to compelling problems

**The 'Resource' Approach to Mathematics Education** Luc Trouche, Ghislaine Gueudet, Birgit Pepin, 2019-11-29 This edited volume will help educators better analyze methodological and practical tools designed to aid classroom instruction It features papers that explore the need to create a system in order to fully meet the uncertainties and developments of modern educational phenomena These have emerged due to the abundance of digital resources and new forms of collective work The collected papers offer new perspectives to a rising field of research known as the Documentational Approach to Didactics This framework was first created by the editors of this book It seeks to develop a deeper understanding of mathematics teaching expertise Readers will gain insight into how to meet the theoretical questions brought about by digitalization These include how to analyze teachers work when they prepare for their teaching how to conceptualize the relationships between individual and collective work and how to follow the related processes over the long term The contributors also provide a comparative view in terms of contrasting selected phenomena across different educational cultures and education systems For instance they consider how differences in curriculum resources are available to teachers and how teachers make use of them to shape instruction Coverage also considers the extent to which teachers make use of additional material particularly those available through the global marketplace on the Internet This book builds on works from the Resources 2018 Conference Understanding teachers work through their interactions with resources for teaching held in Lyon France
