Markets and People World Bank,2020-02-10 Romania's income per capita has increased from 26 percent of the EU 28 average in 2000 to 63 percent in 2017 but this economic success rests on the wobbly foundations of unfavorable demographics weak human capital and ineffective institutions Going forward stronger competition and better human capital are critical to increasing the economy's growth potential Romanian manufacturing firms are exposed to domestic and international competition ensuring the flow of resources and market shares to more efficient players This has not been the case for services where anticompetitive regulations and direct state control often limit efficiency gains Romanian state owned enterprises do not compete on an equal footing with private sector firms distorting market outcomes and hampering the efficient allocation of resources Removal of these restrictions would have a significant positive impact on GDP growth Competitively neutral policies are needed to ensure that all enterprises public or private domestic or foreign face the same set of rules Romania's human capital accumulation proxied by the World Bank's Human Capital Index HCI is the lowest in the European Union and varies widely across counties Disparities in education outcomes remain relevant across and within regions of Romania Learning gaps in primary and secondary education persist These can be seen clearly between urban and rural areas across regions and across social groups requiring changes both at the systems level and at the learning center level In the labor market the automation of production processes has started driving demand for higher levels of cognitive skills while jobs involving the routine application of procedural knowledge are shrinking in number A paradigm shift would require reforms in primary and secondary schooling in addition to more targeted actions to establish an effective skills development system to bolster human capital

System Recall Alma Harris, Michelle S. Jones, 2019-10-17 This book argues that much of what passes as contemporary educational reform in education is faulty and damaging It argues that it is time for a system recall and a need to look at what matters most in the pursuit of educational goals The book focuses on what we know about contemporary educational improvement transformation and change It will provide insights into what strategies work long term to build the capacity for principled change at the school and system level The book will consider what leaders can do to secure principled school and system improvement which fully embraces diversity equity and equality It will also dispel some myths about reform at scale and challenge some prevailing ideas about educational change that it will be posited are not helping many young people to reach their potential The main argument of the book is that too many school and system improvement initiatives have not paid sufficient attention to equity issues in their pursuit of ever higher achievement and that the net effect of large scale international assessments have been to distract policy makers in ways that have not always benefitted young people The book will use system examples to underpin and exemplify six core ways of re booting the system and generating progress for all It will highlight the implications for school and system leaders
