Grade Business Studies Memo November 2014:

The Report: Saudi Arabia 2015 Oxford Business Group, 2015-09-22 While Saudi Arabia's economy remains dominated by its hydrocarbons sector several other sectors have emerged in recent years as key propellers of economic growth The Kingdom's financial services industries have continued to expand steadily despite the liquidity challenges posed by falling oil prices Trade and investment are being treated as key priorities as the government looks to negotiate this altered economic landscape aiming to leverage its large population high per capita income and many sea and air links The country's capital markets sector meanwhile is poised for a period of significant growth on the back of the opening of Tadawul to international investors in 2015 and the raft of regulatory upgrades implemented as result The domestic insurance industry which remains dominated by the motor and medical segments has enjoyed double digit growth over the past five years in both revenue and net profit Elsewhere the targets outlined in Vision 2030 indicate that a period of greater opportunity and integration is on the horizon for private players operating in core sectors such as health care utilities industry and ICT

Corruption and Government Susan Rose-Ackerman, Bonnie J. Palifka, 2016-03-07 The second edition of Corruption and Government updates Susan Rose Ackerman's 1999 book to address emerging issues and to rethink old questions in light of new data The book analyzes the research explosion that accompanied the fall of the Berlin Wall the founding of Transparency International and the World Bank's decision to give anti corruption policy a key place on its agenda Time has vindicated Rose Ackerman's emphasis on institutional reform as the necessary condition for serious progress The book deals with routine payoffs and with corruption in contracting and privatization It gives special attention to political corruption and to instruments of accountability The authors have expanded the treatment of culture as a source of entrenched corruption and added chapters on criminal law organized crime and post conflict societies The book outlines domestic conditions for reform and discusses international initiatives including both explicit anti corruption policies and efforts to constrain money laundering

Hidden in Plain Sight Peter J. Wallison, 2016-03-29 The 2008 financial crisis like the Great Depression was a world historical event What caused it will be debated for years if not generations The conventional narrative is that the financial crisis was caused by Wall Street greed and insufficient regulation of the financial system That narrative produced the Dodd Frank Act the most comprehensive financial system regulation since the New Deal There is evidence however that the Dodd Frank Act has slowed the recovery from the recession If insufficient regulation caused the financial crisis then the Dodd Frank Act will never be modified or repealed proponents will argue that doing so will cause another crisis A competing narrative about what caused the financial crisis has received little attention This view which is accepted by almost all Republicans in Congress and most conservatives contends that the crisis was caused by government housing policies This book extensively documents this view For example it shows that in June 2008 before the crisis 58 percent of all US mortgages were subprime or other low quality mortgages Of these 76 percent were on the books of government agencies such as Fannie Mae and Freddie Mac

When these mortgages defaulted in 2007 and 2008 they drove down housing prices and weakened banks and other mortgage holders causing the crisis After this book is published no one will be able to claim that the financial crisis was caused by insufficient regulation or defend Dodd Frank without coming to terms with the data this book contains

Consumer Credit and the American Economy Thomas A. Durkin, Gregory Elliehausen, Michael E. Staten, Todd J. Zywicki, 2014-07-16 Consumer Credit and the American Economy examines the economics behavioral science sociology history institutions law and regulation of consumer credit in the United States After discussing the origins and various kinds of consumer credit available in today's marketplace this book reviews at some length the long run growth of consumer credit to explore the widely held belief that somehow consumer credit has risen too fast for too long It then turns to demand and supply with chapters discussing neoclassical theories of demand new behavioral economics and evidence on production costs and why consumer credit might seem expensive compared to some other kinds of credit like government finance This discussion includes review of the economics of risk management and

funding sources as well discussion of the economic theory of why some people might be limited in their credit search the phenomenon of credit rationing This examination includes review of issues of risk management through mathematical methods of borrower screening known as credit scoring and financial market sources of funding for offerings of consumer credit The book then discusses technological change in credit granting It examines how modern automated information systems called credit reporting agencies or more popularly credit bureaus reduce the costs of information acquisition and permit greater credit availability at less cost This discussion is followed by examination of the logical offspring of technology the ubiquitous credit card that permits consumers access to both payments and credit services worldwide virtually instantly After a chapter on institutions that have arisen to supply credit to individuals for whom mainstream credit is often unavailable including payday loans and other small dollar sources of loans discussion turns to legal structure and the regulation of consumer credit There are separate chapters on the theories behind the two main thrusts of federal regulation to this point fairness for all and financial disclosure Following these chapters there is another on state regulation that has long focused on marketplace access and pricing Before a final concluding chapter another chapter focuses on two noncredit marketplace products that are closely related to credit The first of them debt protection including credit insurance and other forms of credit protection is economically a complement The second product consumer leasing is a substitute for credit use in many situations especially involving acquisition of automobiles This chapter is followed by a full review of consumer bankruptcy what happens in the worst of cases when consumers find themselves unable to repay their loans Because of the importance of consumer credit in consumers financial affairs the intended audience includes anyone interested in these issues not only specialists who spend much of their time focused on them For this reason the authors have carefully avoided academic jargon and the mathematics that is the modern language of economics It also examines the psychological sociological historical and especially legal traditions that go into fully understanding what has led to the demand for consumer credit and to what the markets and institutions that provide these products have become today Who's who Among Students in American Universities and Colleges Henry Pettus Randall,1973 **A.L.A.
