The Neoliberal Diet Gerardo Otero, 2018-10-03 This remarkable comprehensive study of neoliberal agribusiness and the obesity epidemic is critical reading for food studies scholars Contemporary Sociology Obesity rates are rising across the United States and beyond While some claim that people simply eat too much energy dense food while exercising too little The Neoliberal Diet argues that the issue is larger than individual lifestyle choices Since the 1980s the shift toward neoliberal regulation has enabled agribusiness multinationals to thrive by selling a combination of meat and highly processed foods loaded with refined flour and sugars a diet that originated in the United States Drawing on extensive empirical data Gerardo

Otero identifies the socioeconomic and political forces that created this diet which has been exported around the globe at the expense of people's health. Otero shows how state level actions particularly subsidies for big farms and agribusiness have ensured the dominance of processed foods and made fresh foods inaccessible to many. Comparing agrifood performance across several nations including the NAFTA region and correlating food access to class inequality, he convincingly demonstrates the structural character of food production and the effect of inequality on individual food choices. Resolving the global obesity crisis, Otero concludes lies not in blaming individuals but in creating state level programs to reduce inequality and make healthier food accessible to all.

Brexit and After Kumiko Haba, Martin Holland, 2020-12-12. This book makes a new departure from others on the subject. Not only does it analyze Brexit from the domestic point of view in the UK, democracy, social analysis and construction of new institutionalization with the EU, it extends the analysis externally and reconsiders the EU and UK relationship with Asia and the implications for international relations and a new world order. From this foundation, this book presents a broad and diverse spectrum of views concerning Brexit and the EU. For these reasons, it serves as an original and excellent textbook for undergraduate and graduate students as well as for researchers of the EU and international relations. Contributions to this volume are from the European Union Studies Association (EUSA) Asia Pacific Tokyo Conference and affiliated conferences at the following universities between 2017-19: Aoyama Gakuin University, Tokyo; Taiwan National University, Taipei; and Fudan University, Shanghai. Almost all of the authors have engaged in interdisciplinary research on the EU, are members of the EUSA Asia Pacific, and have made public presentations on Brexit and how it relates to the EU, Asia, international relations, economics, and institutions. Therefore, this book presents various aspects of Brexit and its aftermath from the perspectives of the disciplines of political science, economics, and international relations. In its analysis of the UK, the EU, Asia, and the future world order, the EUSA Presidents and executive committee members participated in the Asia Pacific Conference, postgraduate student workshops were organized, and their presentations moderated, thereby guaranteeing both the quality of the contributions to this book as well as encouraging young talented scholars to write about Brexit and the EU. While many books on Brexit have been published, this book offers many new and perspectives that provide suggestions for possible solutions to the problems facing the UK and the EU after Brexit.

Women as Foreign Policy Leaders Sylvia Bashevkin, 2018-08-02. What difference does gender make to foreign diplomacy? What do we know about women's participation as decision makers in international affairs? Is it fair to assume, as many observers do, that female elites will mirror the relatively pacifist preferences of women in the general public as well as the claims of progressive feminist movements? And of particular importance to this book, what consequences follow from the appointment of firsts to these posts? Inspired by recent work in the field of feminist diplomatic history, this book offers the first comparative examination of women's presence in senior national security positions in the United States executive branch. Sylvia Bashevkin looks at four high profile appointees in the United States since 1980: Jeane Kirkpatrick during the Reagan

years Madeleine Albright in the Clinton era Condoleezza Rice during the George W Bush presidency and Hillary Rodham Clinton in the first Obama mandate Bashevkin explores the extent to which each of these women was able to fully participate in a domain long dominated by men focusing in particular on the extent to which each shaped foreign policy in meaningful ways She looks particularly at two specific phenomena first the influence of female decision makers notably their ability to make measurable difference to the understanding and practice of national security policy and second leaders actions with respect to matters of war and women s rights The track records of these four women reveal not just a consistent willingness to pursue muscular aggressive approaches to international relations but also widely divergent views about feminism Women as Foreign Policy Leaders shows how Kirkpatrick Albright Rice and Clinton staked out their presence on the international scene and provided a crucial antidote to the silencing of women s voices in global politics

Social Reproduction and the City Simon Black, 2020 The transformation of child care after welfare reform in New York City and the struggle against that transformation is a largely untold story In the decade following welfare reform despite increases in child care funding there was little growth in New York's unionized center based child care system and no attempt to make this system more responsive to the needs of working mothers As the city delivered child care services on the cheap relying on non union home child care providers welfare rights organizations community legal clinics child care advocates low income community groups activist mothers and labor unions organized to demand fair solutions to the child care crisis that addressed poor single mothers need for quality affordable child care as well as child care providers need for decent work and pay Social Reproduction and the City tells this story linking welfare reform to feminist research and activism around the crisis of care social reproduction and the neoliberal city At a theoretical level Simon Black's history of this era presents a feminist political economy of the urban welfare regime applying a social reproduction lens to processes of urban neoliberalization and an urban lens to feminist analyses of welfare state restructuring and resistance Feminist political economy and feminist welfare state scholarship have not focused on the urban as a scale of analysis and critical approaches to urban neoliberalism often fail to address questions of social reproduction To address these unexplored areas Black unpacks the urban as a contested site of welfare state restructuring and examines the escalating crisis in social reproduction He lays bare the aftermath of the welfare to work agenda of the Giuliani administration in New York City on child care and the resistance to policies that deepened race class and gender inequities

Fighting the Great War at Sea Norman Friedman, 2014-10-22 The overriding image of the First World War is the bloody stalemate of the Western Front but although much of the action did occur on land the overall shape of the war _ even the inevitability of British participation _ arose out of its maritime character It was essentially a struggle about access to worldwide resources most clearly seen in the desperate German attempts to deal with the American industrial threat which ultimately levered the United States into the war and thus a consequence of British sea control

This radical new book concentrates on the way in which each side tried to use or deny the sea to the other and in so doing it describes rapid wartime changes not only in ship and weapon technology but also in the way naval warfare was envisaged and fought Combat produced many surprises some like the impact of the mine and torpedo are familiar but this book also brings to light many previously unexplored subjects like creative new tactical practices and improved command and control

The contrast between expectation and reality had enormous consequences not only for the course of the war but also for the way navies developed afterwards This book melds strategic technical and tactical aspects to reveal the First World War from a fresh perspective but also demonstrates how its perceived lessons dominated the way navies prepared for the Second
