Revitalizing Governance, Restoring Prosperity, and Restructuring Foreign Affairs Earl H. Fry, 2014-07-22 The American people generally perceive that the United States is headed in the wrong direction US influence worldwide is waning Capitol Hill is not adequately representing the public's interests and their personal economic wellbeing is in jeopardy This book squarely tackles the list of fault lines currently facing the United States including among others Beltway dysfunctionality concentrated wealth and income not seen since the late 1920s an ultra expensive and inefficient health care system runaway entitlement spending stagnant upward mobility debilitating crony capitalism and incoherent foreign policy

Even more importantly the book offers explicit policy recommendations for solving each fault line relying extensively on best practices in the public and private sectors both at home and abroad Moreover the author emphasizes that the United States is entering a special period which provides it with advantages not found anywhere else in the world a major energy boom favorable demographics unparalleled high technology innovation huge inward investment flows from abroad the revival of its manufacturing sector and its magnetism in attracting to its shores the very best and brightest from around the world Dr Fry asserts that it is quite reasonable to assume that the United States will enter a Renaissance America period by 2030 Doing so however will require painful short term sacrifices major policy changes and the restoration of vibrant representative government In effect the American people must overwhelmingly embrace Abraham Lincoln s vision of governance of the people by the people and for the people

Understanding and

Teaching U.S. Lesbian, Gay, Bisexual, and Transgender History Leila J. Rupp,Susan K. Freeman,2014-12-17

Understanding and Teaching U S Lesbian Gay Bisexual and Transgender History is the first book designed for teachers of U S history at all levels who want to integrate queer history into the standard curriculum Bringing together inspiring narratives from teachers in high schools and universities informative topical chapters about significant historical moments and themes and innovative essays about sources and interpretive strategies well suited to the history classroom this volume is a valuable resource for anyone who thinks history should be an inclusive story Geographers Elizabeth Baigent, André Reyes Novaes, 2017-12-14 Geographers Biobibliographical Studies Volume 36 focuses on 20th century Britain and 19th and 20th century France Six essays on individual geographers are complemented by a group article which describes the building of a French school of geography From Britain the life of Sir Peter Hall one of the most distinguished geographers of recent times and a man widely known outside the discipline is set alongside memoirs of Bill Mead who made the rich geography of the Nordic countries come alive to geographers and others in the Anglophone world Michael John Wise and Stanley Henry Beaver who made their mark through building up the institutions where academic geography was practised and through teaching and Anita McConnell whose geographical training shaped her museum curation and studies of the history of science From France the individual biography of Andr Meynier is juxtaposed with group article on the first five professors of geography at Clermont Ferrand These intellectual biographies collectively show geography and geographers profoundly affected by wider historical events the effect of war particularly the Second World War and the shaping of post war society They show the value of geographical scholarship in elucidating local circumstances and in planning national conditions and as a basis for local national and international friendship *Second Rank Cities in Europe* Roberto Camagni, Roberta Capello, 2017-10-02 Second rank cities are back on the academic scene capturing the interest of scholars with their unexpected recent performance with respect to first rank cities Looking at the data on average urban GDP growth in 139 European cities since 1996 the relatively strong position of large cities over 1 5 million inhabitants on national growth coincides with the periods of fastest expansion while at times of slowdown second rank cities prevail Especially in the recent period of economic downturn second rank cities have recorded annual GDP growth rates much less negative than those of capital cities and in some European countries like Austria and Germany all cities have outperformed their capitals In explaining this phenomenon linking urban dynamics to agglomeration theories seems the most interesting approach However merely to link agglomeration economies to urban size in order to interpret urban performance is neither convincing nor sufficient and it calls for additional investigation into how agglomeration economies work This volume claims that interpretation of the current dynamics in European urban systems especially in the western part of Europe would benefit from exploitation of the traditional concept of agglomeration economies However necessary for this purpose are more in depth considerations on the nature scope intensity and causes of agglomeration economies which do not relate their existence solely to urban size And this is where the main challenge for scholars lies in the interpretation of the missing link

between agglomeration economies and urban dynamics This book was originally published as a special issue of European Planning Studies

Adaptable Cities and Temporary Urbanisms Lauren Andres,2025-02-04 Cities are typically thought of as permanent Structures streets infrastructure and other features of the built environment even if they are periodically replaced are intended to endure But temporary flexible spaces and uses are essential to how cities function and the ways urban dwellers inhabit them Such adaptability moreover is fundamental if cities are to meet the challenges of the future This book examines temporary urbanisms across varied global contexts considering their significance for cities and everyday life as well as for policy and practice It brings together many distinct forms and facets of temporariness and adaptability from sites of consumption by privileged residents to the survival strategies of marginalized groups drawing on examples spanning five continents Lauren Andres explores the driving forces of adaptability as well as the power dynamics and tensions between temporariness and permanence She highlights how adaptability enhances livability sustainability and resilience showing its importance for addressing crises such as climate change socioeconomic inequalities and pandemics Authoritative and wide ranging Adaptable Cities and Temporary Urbanisms reveals why experimentation and creativity are crucial to the present and future of cities

Profit and Prejudice Paul Donovan,2020-11-05 Avoiding prejudice will be critical to economic success in the fourth industrial revolution It is not the new and innovative technology that will matter in the next decade but what we do with it Using technology properly with diverse decision making is the difference between success and failure in a changing world This will require putting the right person in the right job at the right time Prejudice stops that happening Profit and Prejudice takes us through the relationship between economic success and prejudice in labour markets It starts with the major changes that occur in periods of economic upheaval These changes tend to be unpopular and complex and complexity encourages people to turn to the simplistic arguments of scapegoat economics and prejudice Some of the changes of the fourth industrial revolution will help fight prejudice but some will make it far worse The more prejudice there is the harder it will be for companies and countries to profit from the changes ahead Profit is not the main argument against prejudice but can certainly help fight it This book tells a story of the damage that prejudice can do Using economics without jargon students investors and the public will be able to follow the narrative and see how prejudice can be opposed Prejudice is bad for business and the economy Profit and Prejudice explains why

Reclaiming Development Studies Murat Arsel,Anirban Dasgupta,Servaas Storm,2021-06-08 The mission relevance and intellectual orientation of development studies is increasingly challenged from various fronts such as decoloniality global development and randomized control trials The essays featured in this collection together argue for the need of the field to reclaim its critical political economy tradition Building on the contributions of Ashwani Saith the contributions touch upon many of the central questions of development studies centred around structural change labour and inequality

Making Public in a Privatized World David A. McDonald,2016-02-15 How do we provide effective public services in a deeply neoliberal world In the wake of the widespread failure of privatisation efforts societies in the global south are increasingly seeking progressive ways of recreating the public sector With contributors ranging from cutting edge scholars to activists working in health water and energy provision and with case studies covering a broad spectrum of localities and actors Making Public in a Privatized World uncovers the radically different ways in which public services are being reshaped from the grassroots up From communities holding the state accountable for public health in rural Guatemala to waste pickers in India and decentralized solar electricity initiatives in Africa the essays in this collection offer probing insights into the complex ways in which people are building genuine alternatives to privatization while also illustrating the challenges which communities face in creating public services which are not subordinated to the logic of the market or to the monolithic state entities of the past

Handbook on the Geographies of Money and Finance Ron Martin,Jane Pollard,2017-03-31 The aim of this timely work which appears in the wake of the worst global financial crisis since the late 1920s is to bring together high quality research based contributions from leading international scholars involved in constructing a geographical perspective on money Topics covered include the crisis the spatial circuits of finance regulation mainstream financial markets banking equity etc through to the various alternative and disruptive forms of money that have arisen in recent years It will be of interest to geographers political scientists sociologists economists planners and all those interested in how money shapes and reshapes socio economic space and conditions local and regional development

GIS Fundamentals Stephen Wise,2018-09-03 With GIS technology increasingly available to a wider audience on devices from apps on smartphones to satnavs in cars many people routinely use spatial data in a way which used to be the preserve of GIS specialists However spatial data is stored and analyzed on a computer still tends to be described in academic texts and articles which require

specialist knowledge or some training in computer science Developed to introduce computer science literature to geography students GIS Fundamentals Second Edition provides an accessible examination of the underlying principles for anyone with no formal training in computer science See What's New in the Second Edition Coverage of the use of spatial data on the Internet Chapters on databases and on searching large databases for spatial queries Improved coverage on route finding Improved coverage of heuristic approaches to solving real world spatial problems International standards for spatial data The book begins with a brief but detailed introduction to how computers work and how they are programmed giving anyone with no previous computer science background a foundation to understand the remainder of the book As with all parts of the book there are also suggestions for further sources of reading The book then describes the ways in which vector and raster data can be stored and how algorithms are designed to perform fundamental operations such as detecting where lines intersect From these simple beginnings the book moves into the more complex structures used for handling surfaces and networks and contains a detailed account of what it takes to determine the shortest route between two places on a network The final sections of the book review problems such as the Travelling Salesman problem which are so complex that it is not known whether an optimum solution exists Using clear concise language but without sacrificing technical rigour the book gives readers an understanding of what it takes to produce systems which allow them to find out where to make their next purchase and how to drive to the right place to collect it

Ideology and Meaning-Making under the Putin Regime

Marlene Laruelle, 2025-01-14 Much has been written to try to understand the ideological characteristics of the current Russian government as well as what is happening inside the mind of Vladimir Putin Refusing pundits' clichés that depict the Russian regime as either a cynical kleptocracy or the product of Putin's grand Machiavellian designs Ideology and Meaning Making under the Putin Regime offers a critical genealogy of ideology in Russia today Marlene Laruelle provides an innovative multi method analysis of the Russian regime's ideological production process and the ways it is operationalized in both domestic and foreign policies Ideology and Meaning Making under the Putin Regime reclaims the study of ideology as an unavoidable component of the tools we use to render the world intelligible and represents a significant contribution to the scholarly debate on the interaction between ideas and policy decisions By placing the current Russian regime into a broader context of different strains of strategic culture ideological interest groups and intellectual history this book gives readers key insights into how the Russo Ukrainian War became possible and the role ideology played in enabling it

Teacher of Civil War Generals Allen H. Mesch, 2015-07-28 From West Point to Fort Donelson General Charles Ferguson Smith was a soldier's soldier He served at the U S Military Academy from 1829 to 1842 as Instructor of Tactics Adjutant to the Superintendent and Commandant of Cadets During his 42 year career he was a teacher mentor and role model for many cadets who became prominent Civil War generals and he was admired by such former students as Grant Halleck Longstreet and Sherman Smith set an example for junior officers in the Mexican War leading his light battalion to victories and earning three field

promotions He served with Albert Sidney Johnston and other future Confederate officers in the Mormon War He mentored Grant while serving with him during the Civil War and helped turn the tide at Fort Donelson which led to Grant s rise to fame He attained the rank of major general while refusing political favors and ignoring the press Drawing on never before published letters and journals this long overdue biography reveals Smith as a faithful officer excellent disciplinarian able commander and modest gentleman
