QUESTION 3

- 3.1 Read the passage below and answer the questions that follow.

Peat lands are special wetlands that play a very important role in ecology. A peat land, of approximately 6 000 years old, near Mafikeng is almost destroyed because of excessive extraction of water from the nearby Molepo river. The water is extracted for human consumption.

Peat lands like the one near Mafikeng is exceptional and play an important role in storing water as well as preventing climate changes.

Dr Phil-Louis Grundling said that carbon that is 'held' or 'stored' by peat lands combats climate change because it decreases the amount of carbon in the atmosphere.

Peat lands trap about one third of the world's carbon. Approximately 50% of wetlands worldwide are peat lands. However in South Africa about 10% of the wetlands are peat lands.

Grundling explained that peat lands can hold about 1 000 times its own mass in water. This replenishes the water table and is the source that keeps streams flowing. The "sponge effect" of the peat also makes it possible to store water that is then released during dry seasons.

Dr Grundling said that it might be too late to restore the peat land near Mafikeng but it might be possible to restore some parts of it if more water is supplied to this peat land.

The result of this destruction is depletion of the water table. The habitat of numerous fish and frog species that lived in this peat land was also destroyed.

From: *Beeld*, 24 September 2016.

- 3.1.1 Give TWO other reasons (not mentioned in the passage) that can lead to the destruction of wetlands. (2)
- 3.1.2 Discuss reasons from the passage regarding the importance of these specific wetlands for the environment. (4)
- 3.1.3 Suggest a way in which this peat land near Mafikeng can be restored. (2)

Grade Life Science Exam Paper 2014:

Collaborating for Inquiry-Based Learning Virginia L. Wallace, Whitney N. Husid, 2016-12-05 This newly updated and expanded second edition of *Collaborating for Inquiry Based Learning* explains effective IBL scaffolding and the school librarian's role as the lead in the collaborative process of inquiry based teaching. Want to learn how to easily put inquiry theory into practice in your school library? This newly revised and expanded practical resource links pedagogical theory, research, and practical application of Inquiry Based Learning (IBL). An important resource for school librarians, classroom teachers, and school library preparation programs, this thoroughly updated second edition of *Collaborating for Inquiry Based Learning* explores Inquiry Based Learning in greater depth and addresses new educational insights. Readers will learn the new research model PLAN and understand how the steps Prepare, Learn, Analyze, and New Discoveries define a deliberative metacognitive process that offers simplicity and flexibility. This step by step guide moves new and experienced educators seamlessly from assessment of students' needs and prior knowledge through formative and summative assessments to reflection. It offers practical applications for immediate use by educators with students and makes it clear why the school librarian is ideally suited to be the lead in the collaborative process of inquiry based teaching. This comprehensive guide to IBL is appropriate as a main text or supplementary reading for courses in instructional design and curriculum.

The Best Class You Never Taught Alexis Wiggins, 2017-09-27 The best classes have a life of their own powered by student led conversations that explore texts, ideas, and essential questions. In these classes, the teacher's role shifts from star player to observer and coach as the students think critically, work collaboratively, participate fully, behave ethically, ask and answer high level questions, support their ideas with evidence, and evaluate and assess their own work. The Spider Web Discussion is a simple technique that puts this kind of class within every teacher's reach. The name comes from the weblike diagram the observer makes to record interactions as students actively participate in the discussion, lead and support one another's learning, and build community. It's proven to work across all subject areas and with all ages, and you only need a little know-how, a rubric, and paper and pencil to get started. As students practice Spider Web Discussion, they become stronger communicators, more empathetic teammates, better problem solvers, and more independent learners—college and career ready skills that serve them well in the classroom and beyond.

Educator Alexis Wiggins provides a step by step guide for the implementation of Spider Web Discussion, covering everything from introducing the technique to creating rubrics for discussion, self-assessment, to the nuts and bolts of charting the conversations and using the data collected for formative assessment. She also shares troubleshooting tips, ideas for assessment and group grading, and the experiences of real teachers and students who use the technique to develop and share content knowledge in a way that's both revolutionary and truly inspiring.
