I Mattered a Teacher'S Story Dr. Frankie J. Monroe-Moore,2012-02-21 In The New Meaning of Educational Change Fullen wrote Low morale depressed feeling unfairly blamed for the ills of society You must be a teacher This quote spoke volumes to me as I watched politicians jockeying for position by spewing their recycled political rhetoric and then launch an all out attack against public school teachers In years past these attacks had been levied against those receiving social security Medicare and Medicaid which mainly affected the poor disabled and elderly Dont get me wrong these issues are still on the table but I guess politicians felt they had beaten them with a dead horse and needed another soft target to spark the publics interest so public school teachers was it They struck with a vengeance firing public school teachers by the thousands throughout the country In an attempt to reduce the collective bargaining power of teacher unions such as American Federation of Teacher AFT in Texas they claimed the only way they knew to help balance the state and district school budget shortfalls was to rescind some of the benefits they had agreed too It hurts when the profession Ive dedicated over half of my adult life 25 yrs to is under attack by politicians and others that have no true concept of whats involved in being a public school teacher We have absolutely nothing to do with the decision making process First were told to do one thing and then

were told to do something entirely different Its almost schizophrenic To all of my colleagues that remain on the frontlines of public education and those that are planning to take up the banner This books for you You might not have control over the decisions being made outside your classroom but you can control those things going on inside I provide ways to control student behavior by the design of your classroom to the use of a simple yellow tablet **The Home School Manual** Theodore E. Wade,1998 **Study of Academic Instruction for Disadvantaged Students** ,1991 **Cultivating the Learner-Centered Classroom** Kaia Tollefson,Monica K. Osborn,2007-12-06 A superb book that does exactly what it promises takes the reader from theory to practice Rich with clear prose strong research and thoughtful reflection this useful tool is for teachers who want to engage students more deeply with each other the content and the world all for the sake of real learning Parker J Palmer Author The Courage to Teach Facilitate the growth of successful learning communities both in the classroom and schoolwide Teachers at every level face the challenge of finding a balance between learner centered philosophies and day to day classroom life Aligned with progressive educational thought this book shows teachers how to make the jump from theory to practice and cultivate learning communities in the classroom and in their schools The authors help both new and experienced educators engage in a fundamental shift in their teaching approach from behaviorism to constructivism from following recipes to understanding the learning process from standardized age based expectations to using standards for individualizing expectations and instruction and from coercing obedience to facilitating students authority and autonomy Readers will find examples illustrating learner centered strategies in action information about how to work more effectively with students with special needs and methods for Organizing the classroom Planning instruction for individuals small groups or an entire class Building students responsibility for their own learning Observing assessing and reporting student growth Practical and accessible Cultivating the Learner Centered Classroom is an essential companion for teachers who want to empower and motivate students for lifelong learning **Instructor and Teacher** ,1981 [Becoming a Multiple Intelligences School](#) Thomas R. Hoerr,2000-02-15 In this invaluable book Tom Hoerr relates a decade s worth of MI experiences at St Louis New City School We learn about the staff s initial exposure to MI theory the many activities some more successful than others that were undertaken by faculty and staff in teaching curriculum adult development and assessment the challenges that the leader faces in attempting to bring about significant and lasting change Especially compelling are the continuing efforts to develop the personal intelligences during a period when issues of diversity multiculturalism and standards loom so large Hoerr underscores the centrality of collegiality the problems posed by transient students and faculty the complementary role played by public exhibitions and standardized test scores the role of friends in determining the activities and intelligences favored by children the delicate line between support and challenge that the leader must walk the tension between excellence and perfection I value the concrete examples as well as the ties to important conceptual work such as that undertaken by Roland Barth on collegiality Peter Salovey on emotional intelligence

and Peter Senge on the learning organization Achieving excellence has always been a process Hoerr makes it abundantly clear that the effort to use MI ideas effectively must remain on the agenda Still I can testify that over a 10 year period clear palpable impressive progress can be made We can improve schools significantly but only if we take the long view and do not settle for patchwork fixes Note This product listing is for the Adobe Acrobat PDF version of the book Disrupting Secondary STEM Education Margery Gardner,2024-12-19 This volume brings into focus the pivotal educational years during adolescence when many learners are exposed to implicit and explicit messages that STEM is not a viable educational pathway for them Challenging this notion Disrupting Secondary STEM Education brings together a collective of critical educators who share what disruptive STEM teaching looks and feels like from an insider perspective as well as the ways they purposefully create curriculum to subvert existing structures that can confine learning Through disruptive STEM teaching a joy for learning is kindled as well as a sense of empowered criticality in students that can support their development as global citizens facing complex futures The collection shares stories across a spectrum of educators from those beginning their teaching journey to those who ve stood up against narrow curriculum and standardized testing for years in the capacity of both P 12 teachers and teacher educators The voices of these educators illustrate how the work of disruptive STEM teaching can be actualized within cohorts of future teachers achieved through early engagement with critical theories and generative field experiences that support and affirm a wide array of identities This book provides multiple theoretical and practical access points for the reader to understand the work of disruptive STEM teaching and offers a way forward for those interested in developing more critical curriculum in their own classrooms As such it will be important reading for postgraduate students and researchers in Social Justice Education and STEM Education as well as for in service educators
