 BENTON, 2014-07-16 Ebook Purchasing and Supply Chain Management **Bite-Sized Operations Management** Mark S.
 Daskin, 2022-05-31 This text is an introduction to Operations Management Three themes are woven throughout the book
 optimization or trying to do the best we can managing tradeoffs between conflicting objectives and dealing with uncertainty
 After a brief introduction the text reviews the fundamentals of probability including commonly used discrete and continuous
 distributions and functions of a random variable The next major section beginning in Chapter 7 examines optimization The
 key fundamentals of optimization inputs decision variables objective s and constraints are introduced Optimization is applied
 to linear regression basic inventory modeling and the newsvendor problem which incorporates uncertain demand Linear
 programming is then introduced We show that the newsvendor problem can be cast as a network flow linear programming
 problem Linear programming is then applied to the problem of redistributing empty rental vehicles e g bicycles at the end of
 a day and the problem of assigning students to seminars Several chapters deal with location models as examples of both
 simple optimization problems and integer programming problems The next major section focuses on queueing theory
 including single and multi server queues This section also introduces a numerical method for solving for key performance
 metrics for a common class of queueing problems as well as simulation modeling Finally the text ends with a discussion of
 decision theory that again integrates notions of optimization tradeoffs and uncertainty analysis The text is designed for
 anyone with a modest mathematical background As such it should be readily accessible to engineering students economics
 statistics and mathematics majors as well as many business students Decision Modelling and Information Systems
 Nikitas-Spiros Koutsoukis, Gautam Mitra, 2012-12-06 In Decision Modelling And Information Systems The Information Value
 Chain the authors explain the interrelationships between the decision support decision modelling and information systems
 The first two parts of the book focus on the interdisciplinary decision support framework in which mathematical
 programming optimization is taken as the inference engine The role of business analytics and its relationship with recent
 developments in organisational theory decision modelling information systems and information technology are considered in
 depth Part three of the book includes a carefully chosen selection of invited contributions from internationally known
 researchers These contributions are thought provoking and cover key decision modelling and information systems issues The
 final part of the book covers contemporary developments in the related area of business intelligence considered within an
 organizational context The topics cover computing delivered across the web management decision making and socio
 economic challenges that lie ahead It is now well accepted that globalisation and the impact of digital economy are profound
 and the role of e business and the delivery of decision models business analytics across the net lead to a challenging business

environment In this dynamic setting decision support is one of the few interdisciplinary frameworks that can be rapidly adopted and deployed to so that businesses can survive and prosper by meeting these new challenges
