After installing the board, you can test it by following this procedure:

1. Attach a printer to the Controller or make sure the Controller is attached to a SCRAMBLE\*NET PC.
2. Power the system up by first connecting the AC power, then the standby battery.
3. The system goes through its self test. You should see this information printed out at the local printer:

Under the **Configuration** section, you should see this:

Expansion Inputs = 8

If one AEBB is installed and

Expansion Inputs = 16

If two AEBBs are installed.

Under the **Options** section, you should see this line:

AEBB-1

If one AEBB is installed and

AEBB-2

If two AEBBs are installed.

4. Use Command MP2 from the ScrambleNet to request the Main Units and Options information, or use Host PC software.
5. If the correct information doesn't appear on the printers, power down the Controller and recheck the IEEE\* connections, then retry the test procedure. If it still doesn't work, contact Hirsch.
