

Analysis of Historical Sources

The French Revolution

The "Parisian Riots on 14th July 1789" is a historical account of the events that took place one day before and during that fateful day when protesters took over the Bastille (Principal Dates and Timeline of the French Revolution, 2008). The events in the article were narrated from memory by Pierre-Victor Besenval, following the events before the capture of the famous Bastille. Besenval was in command of the royal guards in Paris, and the decision of how they will restrain the citizens protesting all over the city lay in his hands. During this time, the force and determination of the protesters led him to believe that Besenval and the royal soldiers were no longer in control of the situation. The diminishing power of the royal guards has allowed protesters the ability to storm the Bastille and take weapons or firearms for the greater insurgency that was yet to come in the following days. (Godechot, 1970)

This narration, written by Besenval, may be considered a primary source as it was revealed to readers by an individual who has experienced first-hand the events that took place during the 14th of July in 1789. It seemed like a journal or book entry written by Besenval as it narrates what had happened on particular dates during the French Revolution. (Primary and Secondary Sources, 2008) Although it might have been translated, suggesting the idea that it might have been modified from its original form, the article is still considered a primary source because it was written by an individual who experienced the actual events during the days leading to the storming of the Bastille. (Primary Source Analysis and the 6 C's, 2007)

Moreover, this article is helpful, especially for historians who are working on putting together information that will narrate the events that happened during the French Revolution chronologically. Besenval's contribution to history is only a single piece of the puzzle that will help historians establish an unbiased view of the events, such that historians will be able to reveal historical information through the eyes of Besenval who represents one side of the story, and that information from the narration could be used to put his perspective vis-à-vis the perspective of the protesters.

Although this seems to be one of the strengths of this primary source because it allows an unbiased view of the events that led to the take over of the Bastille in the eyes of Besenval, this also becomes the weakness of this piece of primary source. It is one-sided, such that it only explains what events took place as experienced and interpreted by Besenval. Furthermore, Besenval's choice of words criticizes significantly the actions taken by protesters – that is, Besenval and the royal guards kept everything together by avoiding violence, while the protesters were illustrated to
