Hoffenberg, Professor Richard D Fulton**

History Paper 1 0470 2013:

Urban Nature and Childhoods Iris Duhn, Karen Malone, Marek Tesar, 2020-06-29 This book challenges the notion that nature is a city's opposite and addresses the often overlooked concept of urban nature and how it relates to children's experiences of environmental education. The idea of nature deficit as well as concerns that children in cities lack for experiences of nature speaks to the anxieties that underpin urban living and a lack of natural experiences. The contributors to this volume provide insights into a more complex understanding of urban nature and of children's experiences of urban nature. What is learned if nature is not somewhere else but right here wherever we are? What does it mean for children's environmental learning if nature is a relationship and not an entity? How can such a relational understanding of urban nature and childhood support more sustainable and more inclusive urban living? In raising challenging questions about childhoods and urban nature, this book will stimulate much needed discussion to provoke new imaginings for researchers in environmental education, childhood studies and urban studies. This book was originally published as a special issue of *Environmental Education Research*.

Rodrigues, João, Cardoso, Pedro, Monteiro, Jânio, Figueiredo, Mauro, 2016-06-29 *Human Computer Interaction* HCI is easy to define yet difficult to predict. Encompassing the management, study, planning and design of the ways in which users interact with computers, this field has evolved from using punch cards to force touch in a matter of decades. What was once considered science fiction is now ubiquitous. The future of HCI is mercurial yet predictions point to the effortless use of high functioning services. The *Handbook of Research on Human Computer Interfaces, Developments and Applications* is primarily concerned with emerging research regarding gesture interaction, augmented reality and assistive technologies and their place within HCI. From gaming to rehabilitation systems, these new technologies share the need to interface with humans and as computers become thoroughly integrated into everyday life, so does the necessity of HCI research. This handbook of research benefits the research needs of programmers, developers, students and educators in computer science and researchers.

Oceania and the Victorian Imagination Professor Peter H. Hoffenberg, Professor Richard D. Fulton, 2013-04-28 Oceania or the South Pacific loomed large in the Victorian popular imagination. It was a world that interested the Victorians for many reasons, all of which suggested to them that everything was possible there. This collection of essays focuses on Oceania's impact on Victorian culture, most notably travel writing, photography, international exhibitions, literature and the world of children. Each of these had significant impact. The literature discussed affected mainly the middle and upper classes, while exhibitions and photography reached down into the working classes as did missionary presentations. The experience of children was central to the Pacific's effects as youthful encounters at exhibitions, chapel, home or school formed lifelong impressions and experience. It would be difficult to fully understand the Victorians as they

understood themselves without considering their engagement with Oceania While the contributions of India and Africa to the nineteenth century imagination have been well documented examinations of the contributions of Oceania have remained on the periphery of Victorian studies Oceania and the Victorian Imagination contributes significantly to our discussion of the non peripheral place of Oceania in Victorian culture **International Surrogacy as Disruptive Industry in Southeast Asia**
