1 An Initial Assignment I haven't taught the history of mathematics that often but I do rather like the course The chief drawbacks to teaching it are that i it is a lot more work than teaching a regular mathematics course and ii in American colleges at least the students taking the course are not mathematics majors but education majors and in the past I had found education majors to be somewhat weak and unmotivated The last time I taught the course however the majority of the students were graduate education students working toward their master's degrees I decided to challenge them right from the start 1 Assignment In An Outline of Set Theory James Henle wrote about mathematics Every now and then it must pause to organize and reflect on what it is and where it comes from This happened in the sixth century B C when Euclid thought he had derived most of the mathematical results known at the time from five postulates Do a little research to find as many errors as possible in the second sentence and write a short essay on them The responses far exceeded my expectations To be sure some of the undergraduates found the assignment unclear I did not say how many errors they were supposed to find But many of the students put their hearts and souls 1 My apology to Prof Henle at whose expense I previously had a little fun on this matter I used it again not because of any animosity I hold for him but because I was familiar with it and dealing with Euclid it seemed appropriate for the start of my course British Book News British Council,1984 **British Book News** ,1984 **The New Cambridge English Course 4 Teacher's Book** Michael Swan,Catherine Walter,Desmond O'Sullivan,1993-06-24 The New Cambridge English Course is a four level course for learners of English *A History of Film Music* Mervyn Cooke,2008-09-25 This book provides a comprehensive and lively introduction to the major trends in film scoring from the silent era to the present day focussing not only on dominant Hollywood practices but also offering an international perspective by including case studies of the national cinemas of the UK France India Italy Japan and the early Soviet Union The book balances wide ranging overviews of film genres modes of production and critical reception with detailed non technical descriptions of the interaction between image track and soundtrack in representative individual films In addition to the central focus on narrative cinema separate sections are also devoted to music in documentary and animated films film musicals and the uses of popular and classical music in the cinema The author analyses the varying technological and aesthetic issues that have shaped the history of film music and concludes with an account of the modern film composer's working practices **Sounds of the New Deal** Peter Gough,2015-02-28 At
