
How to Write a Scholarly Book Review for Publication in a Peer-Reviewed Journal

A Review of the Literature

Alexander D. Lee, DC, Canadian Memorial Chiropractic College, **Bart N. Green, DC, MSEd,** Naval Medical Center, San Diego, National University of Health Sciences, **Claire D. Johnson, DC, MSEd,** National University of Health Sciences, and **Julie Nyquist, PhD,** University of Southern California

Purpose: To describe and discuss the processes used to write scholarly book reviews for publication in peer-reviewed journals and to provide a recommended strategy and book appraisal worksheet to use when conducting book reviews. **Methods:** A literature search of MEDLINE, EMBASE, CINAHL, and the Index to Chiropractic Literature was conducted in June 2009 using a combination of controlled vocabulary and truncated text words to capture articles relevant to writing scholarly book reviews for publication in peer-reviewed journals. **Results:** The initial search identified 839 citations. Following the removal of duplicates and the application of selection criteria, a total of 78 articles were included in this review including narrative commentaries ($n = 26$), editorials or journal announcements ($n = 25$), original research ($n = 18$), and journal correspondence pieces ($n = 9$). **Discussion:** Recommendations for planning and writing an objective and quality book review are presented based on the evidence gleaned from the articles reviewed and from the authors' experiences. A worksheet for conducting a book review is provided. **Conclusions:** The scholarly book review serves many purposes and has the potential to be an influential literary form. The process of publishing a successful scholarly book review requires the reviewer to appreciate the book review publication process and to be aware of the skills and strategies involved in writing a successful review.
