WIP: The Executioners Three (TET)

I'm avoiding writing. I don't know why — once I start, I tend to get in the zone and this next scene should be exciting. I guess I'm scared. It's daunting — completely rewriting a book. AGAIN. There is time #3 and I feel like I don't quite have Fiddle's voice — maybe I'm trying too hard on not hard enough. It feels kinda meh is all I know. Plus, I don't have Simon's voice at all... But HEY, sooo Did you have Sam or Sasha right away? No. It took some false starts and rewrites. So why are you expecting so much? All I need to do is hammer out a scene a day until I leave for Australia (or hit 100 pages). If I can get 16 pages/day, I'll reach my goal by November. Remember: there's no real rush here. Truthswitch is on submissions, Karen can WAIT for this, and book 3 is all done. Books take time, sooo. Patience.

Now, go write the next scene. ♥

HOURS LATER: Okay. ~900 words and some ~~more~~ editing of scene 1 later, and I'm trying to psych myself up to scene #3. I have a total of 10-11 pages, which puts me EXACTLY on track. But I'd rather get AHEAD of track. ☺

economics Write Like a Chemist Marin Robinson, Fredricka Stoller, Molly Costanza-Robinson, James K. Jones, 2008-08-18

Write Like a Chemist is a unique guide to chemistry specific writing. Written with National Science Foundation support and extensively piloted in chemistry courses nationwide, it offers a structured approach to writing that targets four important chemistry genres: the journal article, conference abstract, scientific poster, and research proposal. Chemistry students, postdocs, faculty, and other professionals interested in perfecting their disciplinary writing will find it an indispensable reference. Users of the book will learn to write through a host of exercises ranging in difficulty from correcting single words and sentences to writing professional quality papers, abstracts, posters, and proposals. The book's read-analyze-write approach teaches students to analyze what they read and then write, paying attention to audience, organization, writing conventions, grammar, and science content, thereby turning the complex process of writing into graduated, achievable tasks. Concise writing and organizational skills are stressed throughout, and move structures teach students conventional ways to present their stories of scientific discovery. This resource includes over 350 excerpts from ACS journal articles, ACS conference abstracts, and successful NSF CAREER proposals, excerpts that will serve as useful models of chemistry writing for years to come. Other special features include: usable in chemistry lab lecture and writing dedicated courses; useful as a writing resource for practicing chemists; augmented by Language Tips that address troublesome areas of language and grammar in a self-study format; accompanied by a Web site (<http://www.oup.com/us/writelikeachemist>); supplemented with an answer key for faculty adopting the book.

How to Write Better Medical Papers Michael Hanna, 2019-03-20

This book guides medical researchers through all stages of transforming their scientific data and ideas into a published paper. Many researchers in medicine, including the life sciences and health sciences, struggle to get their research written and published. Manuscripts are typically rejected and/or sent back for revisions several times before ever being published. One reason for this is that researchers have not received much instruction in the specific subjects and skills needed to write and publish scientific medical papers: research methodology, ethics, statistics, data visualization, writing, revising, and the practicalities of publishing. Instead of wasting the reader's time discussing trivialities of punctuation, spelling, etc., this book tackles all the major scientific issues that routinely lead to manuscripts getting rejected from the journals. The section Preparing covers the range of methodological, ethical, and practical aspects that researchers need to address before starting to write their paper. The section Analyzing reviews commonplace problems in the statistical analysis and presentation and how to resolve those problems. The section Drafting describes what to write in all the various parts of a paper: the Introduction, Methods, Results, Discussion, Abstract, etc. The section Revising explains and illustrates how to improve the writing style of any manuscript. The section Publishing discusses how to navigate the peer review process and all other practical aspects of the publishing phase. This book draws on the author's decade of experience as an independent medical writer and research consultant, but it is not written merely as the personal opinion of yet another expert. The entire book is grounded in the existing scientific and

scholarly literature with extensive references and a lengthy annotated bibliography so readers can quickly obtain more information on any aspect they want. Thus this book provides a more evidence based scholarly account of how medical scientific papers should be written in order to improve medical communication and accelerate scientific progress. After reading this entire book cover to cover medical researchers will know how to write better quality medical papers and they will be able to publish their work in better journals with less time and struggle. This book is essential reading for anyone conducting research in clinical medicine, life sciences or health sciences.

Effective Medical Writing: The Write Way To Get Published (UM Press) Wifred C.G Peh, Kwan-Hoong Ng, 2010. Effective Medical Writing: The Write Way to get Published was edited and updated from a series of well received articles published in the Singapore Medical Journal. These articles were used extensively as resource material for numerous medical and scientific writing workshops held in several countries such as Singapore, Malaysia, Thailand and include the first ever national medical writing workshops staged in The Philippines, Brunei Darussalam, Vietnam, Cambodia and Mongolia. Most of these workshops were endorsed by the Asia Pacific Association of Medical Journal Editors. This book will be helpful to medical and postgraduate students, clinical specialty trainees, aspiring researchers, newly appointed academic staff, allied health professionals and those who are looking to write scientific papers and get published. This book is written in an easy to read style covering all the steps required to prepare manuscripts for biomedical and healthcare publications. The reader will learn about must know issues relating to manuscript processing, authoring, reviewing, editing and other key points related to publishing.
