Breaking Through the Language Barrier: Effective Strategies for Teaching English as a Second Language (ESL) to Secondary School Students in Mainstream Classes Patricia Mertin, 2013-05-10 Teaching students for whom English is not their first language is a huge challenge for any educator. It is frustrating and demoralising for teachers and their students if the language barrier prevents learning and progress in the classroom. Teachers need to know how to overcome common problems and teach ESL students effectively. This concise and informative book provides strategies and practical advice that teachers can use every day in the classroom to help ESL students understand and get to grips with their subject. It includes advice on using the textbook, cultural differences, realistic timescales for learning and language and grammar that is easy to understand, plus chapters on teaching specific subjects. Patricia Mertin is Mother Tongue coordinator at the International School of Dusseldorf and has vast experience of teaching ESL students.

Natural Language Processing Using Very Large Corpora S. Armstrong, Kenneth W. Church, Pierre Isabelle, Sandra Manzi, Evelyne Tzoukermann, David Yarowsky, 2013-04-17 ABOUT THIS BOOK This book is intended for researchers who want to keep abreast of current developments in corpus based natural language processing. It is not meant as an introduction to this field for readers who need one. Several entry level texts are available, including those of Church and Mercer 1993, Charniak 1993, Jelinek 1997. This book captures the essence of a series of highly successful workshops held in the last few years. The response in 1993 to the initial Workshop on Very Large Corpora, Columbus, Ohio, was so enthusiastic that we were encouraged to make it an annual event. The following year we staged the Second Workshop on Very Large

Corpora in Ky oto As a way of managing these annual workshops we then decided to register a special interest group called SIGDAT with the Association for Computational Linguistics The demand for international forums on corpus based NLP has been expanding so rapidly that in 1995 SIGDAT was led to organize not only the Third Workshop on Very Large Corpora Cambridge Mass but also a complementary workshop entitled From Texts to Tags Dublin Obviously the success of these workshops was in some measure a re flection of the growing popularity of corpus based methods in the NLP community But first and foremost it was due to the fact that the work shops attracted so many high quality papers **Survive the IB!**
