**Think Java** Allen B. Downey, Chris Mayfield, 2016-05-06 Currently used at many colleges universities and high schools this hands on introduction to computer science is ideal for people with little or no programming experience The goal of this concise book is not just to teach you Java but to help you think like a computer scientist You ll learn how to program a useful skill by itself but you ll also discover how to use programming as a means to an end Authors Allen Downey and Chris Mayfield start with the most basic concepts and gradually move into topics that are more complex such as recursion and object oriented programming Each brief chapter covers the material for one week of a college course and includes exercises to help you practice what you ve learned Learn one concept at a time tackle complex topics in a series of small steps with examples Understand how to formulate problems think creatively about solutions and write programs clearly and accurately Determine which development techniques work best for you and practice the important skill of debugging Learn relationships among input and output decisions and loops classes and methods strings and arrays Work on exercises involving word games graphics puzzles and playing cards

**PHealth 2016** N. Maglaveras, E. Gizeli, 2016-06-16 Smart mobile systems eHealth and telemedicine as well as social media and gamification have all become important enablers for the provision of the next generation of health services This book presents the proceedings of the 13th International Conference on Wearable Micro and Nano Technologies for Personalised Health pHealth 2016 held in Heraklion Crete in May 2016 pHealth 2016 brings together experts from medical technological political administrative legal and social domains with the aim of further emphasizing the integration of biology and medical data systems and information using mobile technologies The book includes two keynotes and two specially invited talks as well as 21 oral and 10 poster presentations selected by a rigorous review process with a rejection rate of more than 30% from the more than 45 submissions to the conference The book is divided into two sections The first covers mHealth devices applications and biosensors and the second deals with smart personal health systems deep learning interoperability and precision medicine Subjects covered include the development of micro nano bio and smart systems with an emphasis on personalized health virtual care precision medicine big bio data management and analytics as well as security privacy and safety issues This book will be of interest to all those whose work involves the provision of healthcare both today and into the future

Open-Source Electronics Platforms Trung Dung Ngo, 2019-05-20 Open source electronics are becoming very popular and are integrated with our daily educational and developmental activities At present the use open source electronics for teaching science technology engineering and mathematics STEM has become a global trend Off the shelf embedded electronics such as Arduino and Raspberry compatible modules have been widely used for various applications from do it yourself DIY to industrial projects In addition to the growth of open source software platforms open source electronics play an important role in narrowing the gap between prototyping and product development Indeed the technological and social impacts of open source electronics in teaching

research and innovation have been widely recognized

**Embedded and Real Time System Development: A Software Engineering Perspective** Mohammad Ayoub Khan, Saqib Saeed, Ashraf Darwish, Ajith Abraham, 2013-11-19 Nowadays embedded and real time systems contain complex software The complexity of embedded systems is increasing and the amount and variety of software in the embedded products are growing This creates a big challenge for embedded and real time software development processes and there is a need to develop separate metrics and benchmarks Embedded and Real Time System Development A Software Engineering Perspective Concepts Methods and Principles presents practical as well as conceptual knowledge of the latest tools techniques and methodologies of embedded software engineering and real time systems Each chapter includes an in depth investigation regarding the actual or potential role of software engineering tools in the context of the embedded system and real time system The book presents state of the art and future perspectives with industry experts researchers and academicians sharing ideas and experiences including surrounding frontier technologies breakthroughs innovative solutions and applications The book is organized into four parts Embedded Software Development Process Design Patterns and Development Methodology Modelling Framework and Performance Analysis Power Management and Deployment with altogether 12 chapters The book is aiming at i undergraduate students and postgraduate students conducting research in the areas of embedded software engineering and real time systems ii researchers at universities and other institutions working in these fields and iii practitioners in the R D departments of embedded system It can be used as an advanced reference for a course taught at the postgraduate level in embedded software engineering and real time systems

**STAIRS 2012** Kristian Kersting, Marc Toussaint, 2012 The field of Artificial Intelligence is one in which novel ideas and new and original perspectives are of more than usual importance The Starting AI Researchers Symposium STAIRS is an international meeting which supports AI researchers from all countries at the beginning of their career PhD students and those who have held a PhD for less than one year It offers doctoral students and young post doctoral AI fellows a unique and valuable opportunity to gain experience in presenting their work in a supportive scientific environment where they can obtain constructive feedback on the technical content of their work as well as advice on how to present it and where they can also establish contacts with the broader European AI research community This book presents revised versions of peer reviewed papers presented at the Sixth STAIRS which took place in Montpellier France in conjunction with the 20th European Conference on Artificial Intelligence ECAI and the Seventh Conference on Prestigious Applications of Intelligent Systems PAIS in August 2012 The topics covered in the book range over a broad spectrum of subjects in the field of AI machine learning and data mining constraint satisfaction problems and belief propagation logic and reasoning dialogue and multiagent systems and games and planning Offering a fascinating opportunity to glimpse the current work of the AI researchers of the future this book will be of interest to anyone whose work involves the use of artificial intelligence and intelligent systems

**Service-Oriented Computing** Claus Pahl, Maja Vukovic, Jianwei Yin, Qi Yu, 2018-11-06 This book

**Framework for the Integration of Mobile Device Features in PLM** Hopf, Jens Michael, 2016-07-01 Currently companies have covered their business processes with stationary workstations while mobile business applications have limited relevance Companies can cover their overall business processes more time efficiently and cost effectively when they integrate mobile users in workflows using mobile device features The objective is a framework that can be used to model and control business applications for PLM processes using mobile device features to allow a totally new user experience

**Information Technology - New Generations** Shahram Latifi, 2017-07-15 This volume presents a collection of peer reviewed scientific articles from the 14th International Conference on Information Technology New Generations held at the University of Nevada at Las Vegas on April 10 12 at Tuscany Suites Hotel in Las Vegas The Book of Chapters addresses critical areas of information technology including web technology communications computing architectures software engineering security and data mining

**Open Source Development, Communities and Quality** Barbara Russo, Ernesto Damiani, Scott Hissam, Björn Lundell, Giancarlo

Succi,2008-07-17 We are very pleased to introduce Open Source Development Communities and Quality The International Conference on Open Source Systems has come to its fourth edition OSS 2008 Now Free Libre and Open Source software is by all means now one of the most relevant subjects of study in several disciplines ranging from information technology to social sciences and including also law business and political sciences There are several conference tracks devoted to open source software with several publications appearing in high quality journals and magazines OSS 2008 has been organized with the purpose of being the reference venue for those working in this area being the most prominent conference in this area For this th reason OSS 2008 has been located within the frameworks of the 20 World Computer Congress WCC 2008 in Milan the largest event of IFIP in 2008 We believe that this conference series and the IFIP working group it represents can play an important role in meeting these challenges and hope that this book will become a valuable contribution to the open source body of research Analyzing the Next-Generation Catalog Andrew Nagy,2011-10-01 This issue of Library Technology Reports analyzes five different academic libraries to better understand their investments detailing the outcome thus far and drawing conclusions about the next generation catalog **Cloud-Native Observability with OpenTelemetry** Alex Boten,Charity Majors,2022-05-04 Leverage OpenTelemetry s API libraries tools and the collector to produce and collect telemetry along with using open source tools to analyze distributed traces check metrics and logs and gain insights into application health Key Features Get to grips with OpenTelemetry an open source cloud native software observability standard Use vendor neutral tools to instrument applications to produce better telemetry and improve observability Understand how telemetry data can be correlated and interpreted to understand distributed systems Book Description Cloud Native Observability with OpenTelemetry is a guide to helping you look for answers to questions about your applications This book teaches you how to produce telemetry from your applications using an open standard to retain control of data OpenTelemetry provides the tools necessary for you to gain visibility into the performance of your services It allows you to instrument your application code through vendor neutral APIs libraries and tools By reading Cloud Native Observability with OpenTelemetry you ll learn about the concepts and signals of OpenTelemetry traces metrics and logs You ll practice producing telemetry for these signals by configuring and instrumenting a distributed cloud native application using the OpenTelemetry API The book also guides you through deploying the collector as well as telemetry backends necessary to help you understand what to do with the data once it s emitted You ll look at various examples of how to identify application performance issues through telemetry By analyzing telemetry you ll also be able to better understand how an observable application can improve the software development life cycle By the end of this book you ll be well versed with OpenTelemetry be able to instrument services using the OpenTelemetry API to produce distributed traces metrics and logs and more What you will learn Understand the core concepts of OpenTelemetry Explore concepts in distributed tracing metrics and logging Discover the APIs and SDKs necessary to instrument an application using OpenTelemetry Explore what auto instrumentation

is and how it can help accelerate application instrumentation Configure and deploy the OpenTelemetry Collector Get to grips with how different open source backends can be used to analyze telemetry data Understand how to correlate telemetry in common scenarios to get to the root cause of a problem Who this book is for This book is for software engineers library authors and systems operators looking to better understand their infrastructure services and applications by leveraging telemetry data like never before Working knowledge of Python programming is assumed for the example applications that you ll be building and instrumenting using the OpenTelemetry API and SDK Some familiarity with Go programming Linux and Docker is preferable to help you set up additional components in various examples throughout the book

**Flutter for Beginners** Alessandro Biessek,2019-09-12 A step by step guide to learning Flutter and Dart 2 for creating Android and iOS mobile applications Key FeaturesGet up to speed with the basics of Dart programming and delve into Flutter developmentUnderstand native SDK and third party libraries for building Android and iOS applications using FlutterPackage and deploy your Flutter apps to achieve native like performanceBook Description Google Flutter is a cross platform mobile framework that makes it easy to write high performance apps for Android and iOS This book will help you get to grips with the basics of the Flutter framework and the Dart programming language Starting from setting up your development environment you ll learn to design the UI and add user input functions You ll explore the navigator widget to manage app routes and learn to add transitions between screens The book will even guide you through developing your own plugin and later you ll discover how to structure good plugin code Using the Google Places API you ll also understand how to display a map in the app and add markers and interactions to it You ll then learn to improve the user experience with features such as map integrations platform specific code with native languages and personalized animation options for designing intuitive UIs The book follows a practical approach and gives you access to all relevant code files hosted at github com PacktPublishing Flutter for Beginners This will help you access a variety of examples and prepare your own bug free apps ready to deploy on the App Store and Google Play Store By the end of this book you ll be well versed with Dart programming and have the skills to develop your own mobile apps or build a career as a Dart and Flutter app developer What you will learnUnderstand the fundamentals of the Dart programming languageExplore the core concepts of the Flutter UI and how it compiles for multiple platformsDevelop Flutter plugins and widgets and understand how to structure plugin code appropriatelyStyle your Android and iOS apps with widgets and learn the difference between stateful and stateless widgetsAdd animation to your UI using Flutter s AnimatedBuilder componentIntegrate your native code into your Flutter codebase for native app performanceWho this book is for This book is for developers looking to learn Google s revolutionary framework Flutter from scratch No prior knowledge of Flutter or Dart is required however basic knowledge of any programming language will be helpful

**Big Data Computing** Rajendra Akerkar,2013-12-05 Due to market forces and technological evolution Big Data computing is developing at an increasing rate A wide variety of novel approaches and tools have emerged to tackle the challenges of Big

Data creating both more opportunities and more challenges for students and professionals in the field of data computation and analysis Presenting a mix of industry cases and theory Big Data Computing discusses the technical and practical issues related to Big Data in intelligent information management Emphasizing the adoption and diffusion of Big Data tools and technologies in industry the book introduces a broad range of Big Data concepts tools and techniques It covers a wide range of research and provides comparisons between state of the art approaches Comprised of five sections the book focuses on What Big Data is and why it is important Semantic technologies Tools and methods Business and economic perspectives Big Data applications across industries      **Information Technology and Computer Application Engineering** Hsiang-Chuan Liu,Wen-Pei Sung,Wenli Yao,2013-10-11 This proceedings volume brings together some 189 peer reviewed papers presented at the International Conference on Information Technology and Computer Application Engineering held 27 28 August 2013 in Hong Kong China Specific topics under consideration include Control Robotics and Automation Information Technology Intelligent Computing and      *MACHINE LEARNING FOR NATURAL LANGUAGE PROCESSING* Sandeep Kumar Davuluri ,Mr. Amol Dattatray Dhaygude,Dr. Shweta Dour,Juan C. Orosco,2023-05-03      *Salesforce Platform Enterprise Architecture* Andrew Fawcett,Daniel J. Peter,2023-03-31 Deliver impressive enterprise grade applications using the Salesforce Platform with the help of established architectural patterns and best developer practices Key FeaturesUse the latest capabilities of the Salesforce Platform to code robust apps and web experiences with an extended focus on Lightning Web ComponentsBranch out to Java Node js and other languages with a new chapter exploring app development capabilities using Heroku and FunctionsExtend your application with access to external services following new coverage of OpenAPI enabled API servicesBook Description Salesforce makes architecting enterprise grade applications easy and secure but you ll need guidance to leverage its full capabilities and deliver top notch products for your customers This fourth edition brings practical guidance to the table taking you on a journey through building and shipping enterprise grade apps This guide will teach you advanced application architectural design patterns such as separation of concerns unit testing and dependency injection You ll also get to grips with Apex and fflib create scalable services with Java Node js and other languages using Salesforce Functions and Heroku and find new ways to test Lightning UIs These key topics alongside a new chapter on exploring asynchronous processing features are unique to this edition You ll also benefit from an extensive case study based on how the Salesforce Platform delivers solutions By the end of this Salesforce book whether you are looking to publish the next amazing application on AppExchange or build packaged applications for your organization you will be prepared with the latest innovations on the platform What you will learnCreate and deploy packaged apps for your own business or for AppExchangeUnderstand Enterprise Application Architecture patternsCustomize the mobile and desktop user experience with Lightning Web ComponentsManage large data volumes with asynchronous processing and big data strategiesLearn how to go beyond the Apex language and utilize Java and Node js to scale your skills and code with Heroku and Salesforce

FunctionsTest and optimize Salesforce Lightning UIsUse Connected Apps External Services and Objects along with AWS integration tools to access off platform code and data with your applicationWho this book is for If you are a Salesforce developer who wants to unlock the true potential of the Salesforce platform and deliver complex scalable applications within your company or for use in large enterprises you target through AppExchange then you have come to the right place You will need a solid foundation of Salesforce development to dive into this book it is here to elevate your skills not teach you the basics
