Online Laboratories in Engineering and Technology Education Dominik May, Michael E. Auer, Alexander Kist, 2025-01-29

This comprehensive book divided into seven sections showcases groundbreaking research findings that blend new experiences from the COVID 19 pandemic with long term research on online laboratories and virtual experimentation. Providing an adequate learning experience in the laboratory has long been a major challenge in science engineering and technology education. Recent years have further revealed the complexities of offering distance or remotely accessible educational settings particularly for laboratory based courses. In response many academic institutions have innovated by transitioning their laboratory classes into online laboratories or providing laboratory kits for at home use. This unprecedented situation has sparked numerous new developments approaches and activities revolutionizing the field. With contributions from leading researchers and practitioners across diverse disciplines this book delves into current trends addresses critical challenges and uncovers future opportunities for laboratory based education in the context of online learning. Whether readers are educators seeking innovative teaching strategies researchers exploring the latest advancements or academic leaders looking to enhance remote learning experiences this book provides valuable insights and practical solutions. It explores how online laboratories are transforming education and discovers the potential they hold for the future.

Advanced, Contemporary Control Andrzej Bartoszewicz, Jacek Kabziński, Janusz Kacprzyk, 2020-06-24. This book presents the proceedings of the 20th Polish Control Conference. A triennial event that was first held in 1958 the conference successfully combines its long tradition with a modern approach to shed light on problems in control engineering automation robotics and a wide range of applications in these disciplines. The book presents new theoretical results concerning the steering of dynamical systems as well as industrial case studies and worked solutions to real world problems in contemporary engineering. It particularly focuses on the modelling identification analysis and design of automation systems however it also addresses the evaluation of their performance efficiency and reliability. Other topics include fault tolerant control in robotics automated manufacturing mechatronics and industrial systems. Moreover it discusses data processing and transfer issues covering a variety of methodologies including model predictive robust and adaptive techniques as well as algebraic and geometric methods and fractional order calculus approaches. The book also examines essential application areas such as transportation and autonomous intelligent vehicle systems robotic arms mobile manipulators cyber physical systems electric drives and both surface and underwater marine vessels. Lastly it explores biological and medical applications of the control theory inspired methods. *Proceedings of Mechanical Engineering Research Day 2019* Mohd Fadzli Bin
