Managerial Decision Modeling with Spreadsheets Barry Render, Ralph M. Stair, Nagraj Balakrishnan, 2003 For courses in Management Science Decision Modeling and Quantitative Analysis in schools of business Can be used in either the undergraduate or graduate course This new text emphasizes the use of spreadsheets as a tool to quickly set up and solve decision models but remains at heart a management science text that provides a clear presentation of fundamental concepts assumptions and limitations behind each decision model *Managerial Decision Modeling with Spreadsheets, Canadian Edition [by] Render, Stair, Balakrishnan, Smith. Instructor's Resource CD-ROM [electronic Resource] ,2005* *Managerial Decision Modeling* Nagraj (Raju) Balakrishnan, Barry Render, Ralph Stair, Charles Munson, 2017-08-07 This book fills a void for a balanced approach to spreadsheet based decision modeling In addition to using spreadsheets as a tool to quickly set up and solve decision models the authors show how and why the methods work and combine the user s power to logically model and analyze diverse decision making scenarios with software based solutions The book discusses the fundamental concepts assumptions and limitations behind each decision modeling technique shows how each decision model works and illustrates the real world usefulness of each technique with many applications from both profit and nonprofit organizations The authors provide an introduction to managerial decision modeling linear programming models modeling applications and sensitivity analysis transportation assignment and network models integer goal and nonlinear programming models project management decision theory queuing models simulation modeling forecasting models and inventory control models The additional material files Chapter 12 Excel files for each chapter Excel modules for Windows Excel modules for Mac 4th edition errata can be found at <https://www.degruyter.com/view/product/486941> *Agricultural Marketing* James Vercammen, 2012-01-11 The price of food has become very volatile in recent years for a variety of reasons including a strengthened connection between the prices of agricultural commodities and other commodities such as oil and metals more volatile production due to more frequent droughts and floods and a rising demand for biofuels Understanding the determinants of agricultural commodity prices and the connections between prices has become a high priority for academics and applied economists who are interested in agricultural marketing and trade policy analysis and international rural development This book builds on the various theories of commodity price relationships in competitive markets over space time and form It also builds on the various theories of commodity price relationships in markets that are non competitive because processing firms exploit market power private information distorts commodity bidding and bargaining is required to establish prices when the marketing transaction involves a single seller and buyer Each chapter features a spreadsheet model to analyze a particular real world case study or plausible scenario and issues considered include the reasons for commodity price differences across regions the connection between the release of information and the rapid adjustment in a network of commodity prices the specific linkage between energy and food prices bidding strategies by large exporters who

compete in import tenders The simulation results that are obtained from the spreadsheet models reveal many important features of commodity prices The models are also well suited for additional what if analysis such as examining how the pattern of trade in agricultural commodities may change if shipping becomes more expensive because of substantial increase in the world price of oil Model building and the analysis of the simulation results is a highly effective way to develop critical thinking skills and to view agricultural commodity prices in a rigorous and unique way This is an ideal resource for economics students looking to gain develop skills in the areas of Agricultural Marketing Commodity Price Analysis Models of Commodity Markets Quantitative Methods and Commodity Futures Markets
