

A close-up photograph of a bicycle's disc brake system. The focus is on the black metal brake caliper, which is mounted on a fork leg. A white arrow points to a small, silver-colored screw on the caliper, which is used to adjust the distance between the brake pads and the disc. The disc itself is visible in the background, along with the spokes of the wheel. The text "PAD ADJUSTMENT SCREW" is overlaid in a bold, black box at the bottom of the image.
