School Leadership, Citizenship Education and Politics in China Shuqin Xu, 2016-08-23. This book examines and theorizes the dynamics and complexities of leadership in citizenship education in junior secondary schools in Shanghai, China. Specifically, it examines from a macro and micro political theoretical perspective the interactions between principals and school party secretaries (SPSs) and how they respond to the demands of macro and micro political actors. This qualitative empirical research found four major school leadership/citizenship education scenarios in which principals and SPSs addressed the interests of different macro and micro political actors. Moreover, principals and SPSs enjoyed a complicated working relationship at the micro political school level in which they collaborated to fulfill their responsibilities and respond to school macro and micro political actors while competing for power over leadership in citizenship education. Principals' and SPSs' leadership in citizenship education was shaped by inter-related factors including diverse influences in a multi-leveled world, the integration of politics and education, the demands of macro and micro political actors, and personal factors. To interpret these findings, this study proposes a theoretical framework for understanding leadership in citizenship education in China as a political exercise. This theoretical framework is useful for understanding the complexity of school and citizenship education leadership, the micro political relationship between Chinese principals and SPSs, and their dynamic and complex interactions with macro and micro political actors.

China and International Security Donovan C. Chau, Thomas M. Kane, 2014-04-17. The first work of its kind, this strategic assessment of China's national security reveals the nation's intentions, capabilities, and threats and their implications for the United States and the world. As China continues to develop the strategic means to advance its national interests in Asia and around the world, assessing its role in international security is the greatest strategic challenge now faced by the United States and its allies. China and International Security facilitates this critically important understanding by analyzing topics that range from strategic geography and orientation to gender ratios. Using detailed case studies and sharing expert insights, the work provides historical, internal, and contemporary analyses that reveal the nature and character of China's national security. This three-volume set is written for scholars, students, and policymakers. The volumes offer in

depth articles penned by intelligence professionals and journalists as well as entries by scholars in fields as diverse as international politics history and strategic studies While other works may attempt to predict the future of China s rise or the nature of China s future bilateral relationships none so thoroughly examines the totality of China s domestic regional and international security and their implications
