comparative assessments and judgments this interpretation of human historical existence also situates human beings with their capacities for freedom and creativity within the ecological web that sustains all life Human beings Kaufman argues have created religious symbolism as a necessary part of their attempt to orient themselves in the world He shows how Christianity as a system of symbols has figured in this effort and he carefully examines the separate elements of the Christian perspective foremost among them God How does the concept of God as an ultimate point of reference enhance our understanding of today's world and how does the symbol Christ qualify this concept The answers Kaufman proposes clarify the changing relevance of the symbolic world of Christianity Firmly embedded in physical and social science and in the tradition of American pragmatism this thorough reconception of a Christian worldview offers insight into the most basic questions confronting humanity today questions of value meaning and self identity
