African Motors Joshua Grace,2021-10-04 In *African Motors* Joshua Grace examines how everyday Tanzanian drivers mechanics and passengers reconstituted the automobile into a uniquely African form between the late 1800s to the early 2000s

**Organizational Behaviour** Daniel King,Scott Lawley,2013-03-14 A fully integrated fictional running case study that puts abstract theory into a familiar setting Over 100 real life case studies covering topics as diverse as initiation rituals in teams the UK riots and women in boardrooms

*Trade Agreements at the Crossroads* Susy Frankel,Meredith Lewis,2013-11-20 The book examines trade agreements in the context of the current world economic crisis and the uncompleted World Trade Organization WTO Doha Round of trade negotiations With economies shrinking and protectionism on the rise many fear a protracted global recession This raises important questions as to what role trade agreements multilateral plurilateral and bilateral should be playing in the current climate of uncertainty and how best to plan for a more stable economic future Previous assumptions are now being questioned making this an opportune time to critically examine the WTO free trade agreements bilateral investment treaties and other international economic law instruments Furthermore participants in international agreements are concerned with emerging issues that have the potential to strengthen or weaken the global trading system including matters of treaty interpretation terms of new agreements and effects of existing provisions This book provides a timely addition to the international economic law literature as its submissions have been prepared during a time of unusual uncertainty and economic change individuals interested in international economic law will seek scholarship that recognizes the current international economic climate This book should be of interest to a wide range of academics and student researchers as well as policymakers and practitioners

**Junkyards, Gearheads, and Rust** David N. Lucsko,2016-05-15 The material appeal of the automobile junkyard goes beyond the search for second hand parts What happens to automobiles after they are retired but before they are processed as scrap In this fascinating history David N Lucsko takes readers on a tour of salvage yards and wrecked or otherwise out of service cars in the United States from the point of view of gearheads the hot rodders restoration hobbyists street rodders and classic car devotees who reuse repurpose and restore junked cars *Junkyards Gearheads and Rust* is a nuanced exploration of the business of dismantling wrecks and selling second hand parts It examines the reinterpretation of these cars and parts by artists as well as their restoration by enthusiasts It also surveys the origin and evolution of gearhead oriented yards that specialize in specific types of automobiles dissects the material and emotional appeal of the salvage yard and its contents among enthusiasts and examines how zoning and nuisance ordinances have affected both salvage businesses and hobbyists Lucsko concludes with an analysis of efforts during the last twenty five years to hasten vehicular obsolescence at the expense of salvage yards mechanics and enthusiasts By examining how cars are salvaged repurposed and restored this book demonstrates that the history of the automobile is much more than a running catalog of showroom novelties

**Heavy Traffic** Daniel Madar,2011-11-01 Canada and the

United States exchange the world's highest level of bilateral trade valued at 1.4 billion a day. Two thirds of this trade travels on trucks. Heavy Traffic examines the way in which the regulatory reform of American and Canadian trucking coupled with free trade has internationalized this vital industry. Before deregulation restrictive entry rules had fostered two separate national highway transportation markets and most international traffic had to be exchanged at the border. When the United States deregulated first the imbalance between its opened market and Canada's still restricted one produced a surprisingly difficult bilateral dispute. American deregulation was motivated by domestic incentives but the subsequent Canadian deregulation blended domestic incentives with transborder rate comparisons and concerns about trade competitiveness. Daniel Madar shows that deregulation created a de facto regime of free trade in trucking services. Removing regulatory barriers has enabled Canadian and American carriers to follow the expansion of transborder traffic that began with the Canada US Free Trade Agreement and continues with NAFTA. The services available with deregulated trucking have also supported sweeping changes in industrial logistics. As transborder traffic has surged the two countries carriers from billion dollar corporations to family firms have exploited the latitude provided by deregulation. This book is a valuable contribution to our understanding of the policy processes and economic conditions that led to trucking deregulation. As a study in public policy formation and the international effects of reform it will be of interest to students and scholars of political economy, international relations and transportation.

Electronic Design Automation for IC System Design, Verification, and Testing  
Luciano Lavagno, Igor L. Markov, Grant Martin, Louis K. Scheffer, 2017-12-19. The first of two volumes in the Electronic Design Automation for Integrated Circuits Handbook. Second Edition. Electronic Design Automation for IC System Design Verification and Testing thoroughly examines system level design, microarchitectural design, logic verification and testing. Chapters contributed by leading experts authoritatively discuss processor modeling and design tools using performance metrics to select microprocessor cores for integrated circuit IC designs, design and verification languages, digital simulation, hardware acceleration and emulation and much more. New to This Edition: Major updates appearing in the initial phases of the design flow where the level of abstraction keeps rising to support more functionality with lower non-recurring engineering (NRE) costs. Significant revisions reflected in the final phases of the design flow where the complexity due to smaller and smaller geometries is compounded by the slow progress of shorter wavelength lithography. New coverage of cutting edge applications and approaches realized in the decade since publication of the previous edition. These are illustrated by new chapters on high level synthesis, system on chip (SoC), block based design and back annotating system level models. Offering improved depth and modernity, Electronic Design Automation for IC System Design Verification and Testing provides a valuable state of the art reference for electronic design automation (EDA) students, researchers and professionals.

Thin-Walled Composite Protective Structures for Crashworthiness Applications  
A. Praveen Kumar, Tatacipta Dirgantara, Sanjay Mavinkere Rangappa, 2023-08-16. This book summarizes many of the recent advances in the design and

application of thin walled composite protective structures The past few decades have seen outstanding advances in the use of composite materials in structural applications Composites have revolutionized traditional design concepts and made possible an unparalleled range of new and exciting possibilities as viable materials for construction This book presents an extensive survey on recent improvements in the research and development of composites and biocomposites that are used to make structures in various applications This book deals with design research and development studies experimental investigations theoretical analysis and fabrication techniques relevant to the application of composites in load bearing components for assemblies ranging from individual components such as plates and shells to complete composite structures This book also focuses the recent advances in biocomposite materials from renewable resources and introduces a potential application of this material The content of this book benefits the academics researchers scientists engineers and students in the field of epoxy blends for application as lightweight advanced composite structures

**Workers in Hard Times** Leon Fink, Joseph A. McCartin, Joan Sangster, 2014-02-15 Seeking to historicize the 2007-2009 Great Recession this volume of essays situates the current economic crisis and its impact on workers in the context of previous abrupt shifts in the modern day capitalist marketplace Contributors use examples from industrialized North America South America Europe Asia and Australia to demonstrate how workers and states have responded to those shifts and to their disempowering effects on labor Since the Industrial Revolution contributors argue factors such as race sex and state intervention have mediated both the effect of economic depressions on workers' lives and workers' responses to those depressions Contributors also posit a varying dynamic between political upheaval and economic crises and between workers and the welfare state The volume ends with an examination of today's Great Recession its historical distinctiveness its connection to neoliberalism and its attendant expressions of worker status and agency around the world A sobering conclusion lays out a likely future for workers one not far removed from the instability and privation of the nineteenth century The essays in this volume offer up no easy solutions to the challenges facing today's workers Nevertheless they make clear that cogent historical thinking is crucial to understanding those challenges and they push us toward a rethinking of the relationship between capital and labor the waged and unwaged and the employed and jobless Contributors are Sven Beckert Sean Cadigan Leon Fink Alvin Finkel Wendy Goldman Gaetan Heroux Joseph A.
