Readers find this book a vehicle for the dissemination of research results on latest advances made in this area. It is expected that the publication of the research papers with the advanced topics listed in this book will further promote high standard academic research in the field and make a significant contribution to the development of human society. Topics that will be covered in this book include but not limited to: materials science and engineering, engine system design and power machinery, mechanical design, manufacture and automation design and analysis of robot systems, automobile design and manufacturing engineering, thermal and fluid mechanics analysis, aircraft structural design and system control, control theory and engineering applications, electronic information technology. This book is intended for researchers, engineers, and advanced postgraduate students in the fields of automotive production, industrial engineering, and design.

The Railway and Engineering Review Walter Mason Camp, 1910 *New Energy Vehicle Powertrain Technologies and Applications* Yong Chen, 2023-06-15 This book focuses on transmission systems for pure electric and hybrid vehicles. It first discusses system development and optimization technologies comprehensively and systematically, describing the development trends, structures, and technical characteristics, as well as the related technologies and methods. It highlights the principles, implementation process, and energy management of the power transmission system based on the pure electric and hybrid mode management method and examines the reliability and NVH characteristic tests and optimization technologies. Combining research theory and engineering practice, the book is a valuable reference resource for engineering and technical professionals in the field of automobile and related power transmission machinery, as well as undergraduate and graduate students.
