

## Lab. # Classification: The Dichotomous Key

**Task:** With the millions of living organisms in the world, scientists need a method of identifying an unknown organism. To do this, scientists use a dichotomous key. At this station, you will be using a dichotomous key to identify unknown organisms.

### Directions

Use the dichotomous key below to identify any three (3) species of the genus *Triangulum* in the accompanying Species Sheet. Record the choices made, and the resulting scientific name, on the answer sheet provided.

### Dichotomous Key

- |                                                                                                    |                                                                        |
|----------------------------------------------------------------------------------------------------|------------------------------------------------------------------------|
| 1. A. Three(3) sided with straight lines<br>B. Three (3) sided with wavy lines                     | Go to 2<br>Go to 10                                                    |
| 2. A. Has no eyes<br>B. Has eyes                                                                   | Go to 3<br>Go to 5                                                     |
| 3. A. Has flagella for movement<br>B. Has cilia for movement                                       | Go to 4<br>Go to 7                                                     |
| 4. A. The three sides are of equal length<br>B. The three sides are not of equal length            | <i>Triangulum equalius</i><br>Go to 12                                 |
