Congress. House. Committee on Small Business, 2013 *The Messages We Send* G. R. F. Ferrari, 2017-09-22 G R F Ferrari offers a new framework for understanding different ways in which we communicate with each other He explores the idea of intimations social interactions that approach outright communication but do not quite reach it The metaphor from which he starts is that of a communicative scale or switch which goes from off no communication intended to fully on outright communication Intimations lie in between Three intermediate positions are identified quarter on half on and three quarters on Progression along the communicative scale is determined by the extent to which what comes across in the transmission is required to

come across by recognition of the intention of the transmitting party At a quarter on it is required not to at half on it is neither required to nor required not to at three quarters on it is required to but only partially at full on it is required to and the recognition is complete The half on intimation is primarily used for impression management in social life To illustrate it the book concentrates on fashion and the messages we send with our clothes With the quarter on and three quarters on intimation the focus of argument is on the fact that transmissions at the same position of the communicative scale have the same underlying structure whether they are made in the formal arts or in daily life outside the arts For the quarter on intimation the formal art is lyric poetry for the three quarters on intimation it is storytelling The book discusses storytelling at length and at the end investigates its connection to situational irony *Affirmative Action and the Meanings of Merit* Bruce P. Lapenson, 2009-03-16 The public defenses of affirmative action have not convinced the majority of Americans that the policy is necessary and just The notion that merit and qualifications for academic places and jobs can be judged solely by test scores and grades is seriously called into question by the numerous studies analyzed in *Affirmative Action and the Meanings of Merit* These studies show that many affirmative action beneficiaries have succeeded in higher education and various occupations despite not having the required test scores or GPA therefore exposing reified concepts of merit as intellectually murky Public defenders of affirmative action must point to these realities to convince more Americans that such policies are ethical and contribute to the goal of a diverse and fair minded society **State Higher Educational Institutions of Iowa** Charles Hubbard Judd, Charles William Eliot, J. Harold Williams, Kremer Jacob Hoke, United States. Office of Education, Walter E.
